Key Takeaways

Brazilian cable trays typically cost between $2 and $25 per meter, depending on material, type, and finish.

Price Range and Material Factors

The cost of cable trays in Brazil varies widely based on material, type, and coating. Common materials include: Galvanized steel: Most common, balancing durability and cost, typically $10–$30 per meter for standard trays. Aluminum: Lightweight and corrosion-resistant, generally $20–$50 per meter.

Stainless steel: High corrosion resistance, used in hygienic or coastal environments, usually the most expensive option. Plastic/PVC: Budget-friendly, suitable for light loads, often below $10 per meter. Coatings also affect pricing: hot-dip galvanized (HDG) trays are more expensive but highly durable outdoors, while pre-galvanized or powder-coated trays are cheaper but less resistant to corrosion.

Types of Cable Trays

Ladder trays: Strong, support heavy cables, higher cost. Perforated trays: Moderate cost, good ventilation, suitable for medium loads. Wire mesh trays: Lightweight, flexible, and generally the most affordable.

Brazilian Supplier Options

Brazilian suppliers, such as those listed on B2B marketplaces, offer a variety of metal, stainless steel, PVC, and aluminum trays. Prices can vary depending on bulk orders, custom sizes, and delivery logistics. For example, standard hot-dip galvanized ladder trays are priced per standard length (2.

4 meters), and bulk purchases can reduce the per-meter cost.

Cost-

Saving Tips

Bulk purchasing can significantly lower unit costs. Selecting alternative materials like perforated trays instead of ladder trays can save 15% or more. Comparing suppliers and negotiating long-term contracts can reduce overall expenses.

In summary, Brazilian cable tray prices are influenced by material, type, coating, and order volume, with typical costs ranging from $2 to $25 per meter, and higher for specialized or stainless steel trays.
