

18u Network Rack Specifications and Dimensions

Overview

Find durable 18U network racks built from cold-rolled steel. Perfect for organizing servers, switches, and audio-video equipment.

Key Takeaways

An 18U network rack is approximately 31.5 inches (800 mm) tall, with a standard width of 19 inches and variable depths depending on the model.

Each rack unit (U) measures 1.75 inches (44.45 mm) in height, so an 18U rack totals 31.5 inches (800 mm) tall. This makes it a compact option suitable for small to medium-sized businesses, home offices, classrooms, or network closets.

Width

The standard width for most network racks, including 18U models, is 19 inches (482 mm), following the EIA-310 and IEC 60297 standards. This width accommodates most rack-mounted servers, switches, patch panels, and other IT equipment.

Depth

Depth can vary depending on the rack type and intended equipment. Common depths for 18U racks range from 18 inches to 35 inches, with wall-mount or under-desk models typically shallower (around 18–24 inches) and floor-standing racks deeper (up to 35 inches) to accommodate larger servers or UPS units. Adjustable mounting rails allow flexibility for equipment up to 20.5 inches deep in some wall-mount models.

Weight Capacity and Construction

Many 18U racks are constructed from heavy-duty steel with a durable finish and can support loads up to 250 pounds (113.4 kg) . Wall-mount racks often feature hinged doors, vented panels for airflow, and lockable sides for security.

Applications

18U racks are ideal for environments with limited floor space while still needing to house multiple servers, switches, patch panels, and power distribution units. They provide a balance between compact size and sufficient capacity for small IT deployments .

Summary

- Height: 31.5 inches (800 mm)
 - Width: 19 inches (482 mm)
 - Depth: 18-35 inches depending on model
 - Weight Capacity: Up to 250 lbs (113.4 kg)
 - Use Cases: Small to medium businesses, classrooms, network closets, home offices
- This makes the 18U rack a versatile and space-efficient solution for organizing and securing network and server equipment.
