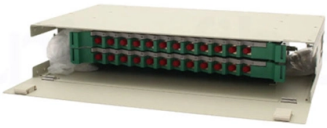
Customized High-End Data Center Power Distribution Boxes



Overview

Custom power distribution boxes featuring precise sheet metal fabrication, designed for efficient power management. Available in various sizes with high-quality materials and professional finishing for reliable performance. Reliable Partner of Power Distribution Box with 15 Years of Experience Submit your requirements or design draft to us, and we'll provide a free design and deliver a high-quality prototype in just 15 days – ensuring your project stays on schedule with speed and precision. Choosing custom power. Whether you're building a hyperscale data center or powering mission-critical IT environments, IEM delivers custom power distribution systems built for high-density loads, rapid deployment, and long-term reliability. Custom power distribution boxes are engineered to meet your specific power. IEM's Power Distribution Units (PDUs) are engineered to deliver reliable, high-capacity power from the critical distribution system to IT equipment on the server floor or to other load points within your data center.
