

6-core fiber optic cable single mode

Overview

This video was associated with the source search result. Verify technical details against current product documentation and project requirements.

Key Takeaways

A 6-core single-mode fiber optic cable is designed for high-speed, long-distance data transmission, featuring six individual fibers for reliable connectivity in telecom and networking applications.

A 6-core single-mode fiber optic cable contains six individual optical fibers, each capable of transmitting light signals over long distances with minimal loss. Single-mode fibers allow light to travel directly down the core, reducing signal attenuation and enabling high-bandwidth communication. These cables typically have an outer diameter of around 5.8 mm and include Fiber Reinforced Plastic (FRP) and yarn layers for added strength and durability, making them suitable for both indoor and outdoor installations.

Key Features

- High-performance connectivity: Ideal for Internet Service Providers (ISPs), telecom networks, and Cable Television (CATV) systems.
- Durability: Reinforced with FRP and yarn to withstand environmental stress and mechanical strain.
- Long-distance transmission: Single-mode design ensures minimal signal loss over extended distances.

- Compact design: Six fibers in a single cable allow multiple connections without increasing cable bulk.

Applications

- Telecommunications networks: Backbone connections for high-speed data transfer.
- FTTH (Fiber to the Home): Provides reliable broadband connectivity to residential and commercial users.
- Data centers and enterprise networks: Connects switches, servers, routers, and patch panels efficiently .
- Industrial and outdoor installations: Suitable for harsh environments due to reinforced construction.

Suppliers and Pricing

In India, several suppliers offer 6-core single-mode fiber optic cables:

- Multicore Infotech: Offers 6-core FTTH single-mode cables with FRP reinforcement .
- IndiaMART suppliers: Dron Edge India, Rahul Cable Ind., and Arrob provide bulk orders and competitive pricing .
- Finolex Optical Fiber: Available from dealers like Vipassana Trades & Industries and SRK Fiber, with prices starting as low as ₹4-₹5.80 per meter . These cables can also be purchased online through platforms like Amazon India, suitable for shorter runs or small-scale installations .

Summary

A 6-core single-mode fiber optic cable is a versatile, high-performance solution for modern communication networks, offering long-distance, low-loss data transmission with robust construction for both indoor and outdoor use. It is widely used in telecom, FTTH, and enterprise networking, and is available from multiple suppliers at competitive prices.
