Compatible QSFPSFP optical modules Fiji supplier

Overview

View results and find fiji oem optical module qsfp datasheets and circuit and application notes in pdf format.

Key Takeaways

QSFP and SFP optical modules compatible with major network equipment can be sourced from international suppliers like QSFPTEK, Amphenol, and Integra Optics, with options suitable for delivery to Fiji.Recommended Suppliers

QSFPTEK QSFPTEK offers a wide range of compatible optical transceivers, including QSFP+ and SFP modules. They provide cost-effective solutions for SMB and enterprise networks, supporting Ethernet, InfiniBand, and Fibre Channel protocols. Their modules are hot-pluggable and compatible with multiple vendor equipment, making them suitable for upgrading or expanding existing networks. QSFPTEK also provides online ordering and international shipping options, which can facilitate delivery to Fiji (store.qsfptek.com) . Amphenol Amphenol supplies high-performance QSFP28, QSFP+, and SFP optical modules, including SR4, LR4, ER4, and AOC series. These modules support IEEE standards such as 802.3bm and SFF-8636, ensuring broad compatibility. They are designed for data centers, metropolitan networks, and telecom applications, with low power consumption and high reliability. Amphenol modules cover a range of distances from short-range multimode to long-range single-mode fiber, making them versatile for different network setups (amphenol.com) . Integra Optics Integra Optics provides QSFP+ transceivers (sometimes called QSFP100) for Ethernet, InfiniBand, and Fibre Channel, supporting data rates up to 100Gbps. They offer both short-range multimode (up to 300 meters) and long-range single-mode (up to 10 kilometers) modules. Their products are hot-pluggable and cost-effective, suitable for high-density network environments (integraoptics.com) .

Compatibility Considerations

• QSFP Modules: QSFP+ supports 4 lanes of 10Gbps (40Gbps total), QSFP28 supports 25Gbps per lane (100Gbps total), and QSFP-DD/112 supports higher rates with backward compatibility for QSFP28 modules .

• SFP Modules: SFP and SFP+ modules are hot-swappable and available in various wavelengths and distances. Ensure the module matches your network equipment's supported data rate, wavelength, and fiber type .

• Standards Compliance: Look for IEEE and MSA compliance (e.g., IEEE 802.3, SFF-8431, SFF-8472) to ensure interoperability with existing switches, routers, and servers.

Shipping to Fiji

While local suppliers in Fiji may be limited, these international vendors typically offer global shipping. When ordering, confirm shipping options, customs requirements, and delivery times to Fiji. For large deployments, contacting the supplier directly for bulk orders or regional distribution support is recommended. By selecting modules from these suppliers, you can ensure compatibility, reliability, and performance for your network infrastructure in Fiji.
