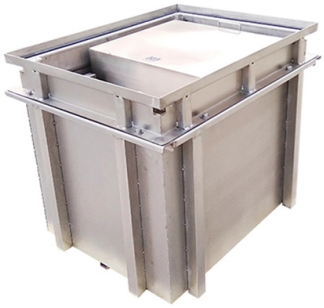
# High-quality fiber optic adapter price quote



## Overview

American Tech Supply''s fiber optic adapters allow for customizing fiber optic patch panels and adapter panels.

## Key Takeaways

High-quality fiber optic adapters typically cost between $2 and $15 per unit, depending on type, connector, and configuration.Price Range by Type and Configuration
• Single-mode vs. Multimode: Single-mode adapters, designed for long-distance transmissions, generally cost slightly more than multimode adapters due to precision requirements and lower insertion loss.

• Connector Types: SC, LC, FC, ST, and E2000 adapters vary in price. LC and SC adapters are the most common and usually range from $2 to $10 per unit, while specialty connectors like E2000 or FC may reach $12–$15 per unit.

• Simplex, Duplex, Quad: Simplex adapters (single fiber) are the least expensive, duplex adapters (two fibers) are moderately priced, and quad adapters (four fibers) are at the higher end of the range due to additional materials and precision alignment .
Factors Affecting Cost
• Material Quality: High-quality adapters use zirconia ceramic sleeves for precise fiber alignment, which reduces insertion loss and improves durability .

• Housing Construction: Metal hybrid or durable plastic housings increase longevity and performance, especially in high-traffic or industrial environments .

• Polish Type: UPC (Ultra Physical Contact) and APC (Angled Physical Contact) polish types affect performance and cost, with APC typically being more expensive due to lower back reflection.

• Bulk Packaging: Buying in bulk packs (e.g., 6-pack or 12-pack) can reduce the per-unit cost, making it more economical for large installations .
Summary

For a high-quality fiber optic adapter suitable for professional networking or data center use, expect to pay $2–$15 per adapter, with duplex and specialty connectors at the higher end. Bulk purchases and standard connector types like LC or SC can help reduce costs while maintaining performance and reliability .
