How much does Om3 pigtail fiber cost

Overview

Fiber Optic Pigtails With the OM3 Multimode ST Fiber Optic Pigtail, you can be sure to receive excellent performance at a budget-friendly price for a Fiber.

Key Takeaways

OM3 fiber optic pigtails typically range from $2 to $10 per unit depending on length, connector type, and vendor.Price Overview
• 1-meter LC/UPC OM3 pigtail: Around $2–$3 per piece for standard single-mode or multimode configurations with a 900µm tight-buffered cable and factory-installed connector (Fiber24) .

• 3-meter LC/UPC OM3 pigtail: Approximately $5–$7 per piece, suitable for fusion splicing and data center applications (mefiberoptic) .

• SC/UPC OM3 pigtail: Prices are competitive and generally fall in the $3–$6 range for standard lengths, with customization options for jacket material, polish, and cable diameter (Optcore) .
Factors Affecting Cost
• Connector Type: LC connectors are smaller and often slightly more expensive than SC connectors due to higher density applications.

• Length: Longer pigtails (e.g., 3 meters) cost more than shorter ones (1 meter) due to additional fiber and materials.

• Customization: Options like flame-retardant jackets, bend-insensitive fibers, or specific polish types can increase the price (Fiber4u) .

• Quantity: Bulk orders often reduce the per-unit cost, especially for data center deployments.
Practical Considerations

OM3 pigtails are laser-optimized multimode fibers (50/125 µm) designed for 10 Gigabit Ethernet and high-bandwidth applications. They are commonly used for fusion splicing to connect trunk cables to patch panels or equipment. Choosing the right length and connector type ensures minimal insertion loss and reliable network performance . For precise pricing, it is recommended to check vendor websites or request a quote, as costs can vary based on length, connector type, and order volume.
