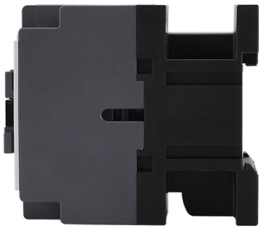
How much does an Andorra micro-module server rack cost



Overview

By opting for a Delta modular rack cabinet, data centers choose the ultimate combination of convenience, flexibility, and safety.

Key Takeaways

A micro-module server rack in Andorra is likely to cost between €3,000 and €50,000, depending on size, power, cooling, and included equipment.Overview

Micro-modular data centers are self-contained, pre-built units that include servers, power backup, cooling, security, and monitoring in a compact, plug-and-play format, ideal for small businesses, telecom sites, or edge computing locations . The cost is highly variable because it depends on the number of cabinets, power capacity, cooling type, and included IT hardware.

Price Ranges
• Basic server racks: Open-frame or small wall-mounted racks start around €200–€500 for a single unit .

• Mid-range racks: Floor-standing racks with better durability and capacity typically cost €500–€2,000 .

• High-end or fully equipped micro-modular units: These include multiple servers, storage, networking equipment, and integrated cooling. Prices can range from €15,000 to €50,000 or more, depending on configuration and redundancy requirements . Individual servers within the rack can start from €550 each, with the final cost increasing based on CPU, memory, storage, and warranty options .
Factors Affecting Cost
• Number of Cabinets and U-Space: More cabinets and higher U-space allow for more servers, increasing cost. Typical micro-modular units range from 1 to 10 cabinets with power capacities from 3 kVA to 20 kVA .

• Cooling Options: Integrated AC, rack-mounted split AC, or in-row cooling affect both upfront cost and long-term energy efficiency .

• Power and Redundancy: Units with UPS, backup generators, or higher power capacity are more expensive.

• Security and Monitoring: Locking doors, tamper alerts, and remote monitoring add to the price.

• Installation and Maintenance: Pre-built units reduce installation costs, but ongoing maintenance and servicing should be considered.
Conclusion

For a small-scale deployment in Andorra, a single-cabinet micro-module server rack with basic servers and cooling could cost around €3,000–€10,000, while a fully equipped, multi-cabinet unit with high-density servers, advanced cooling, and redundancy could reach €50,000 or more. The final price depends on your specific requirements for power, cooling, and IT equipment .
