1. Group Your Cables Start by bundling cables that run in the same direction. Use Velcro ties or zippered cable sleeves to keep them together. Grouping reduces visual clutter and makes it easier to route cables along a single path rather than having multiple loose wires under the glass surface . 2. Choose the Right Cable Tray Select an under-desk or adhesive cable tray that fits the number and thickness of your cables. Cable trays come in various sizes and colors, allowing you to match your desk frame or wall for a seamless look . Adhesive-backed trays are ideal for glass since drilling or screwing is not possible . 3. Attach the Tray Securely Clean the glass surface thoroughly before applying the tray. Use the adhesive provided with the tray to attach it along the underside or back edge of the glass. Ensure the tray is level and can support the weight of your bundled cables . 4. Use Cable Sleeves or Covers For additional protection and aesthetics, place your grouped cables inside a cable sleeve or spiral wrap before placing them in the tray. Zippered fabric sleeves are flexible, allow easy access, and can hold multiple cables, making them ideal for dense setups . 5. Route Cables Strategically Run cables along the natural lines of the desk frame or edges to minimize visibility. If your glass desk has a tinted or framed edge, you can hide cables along these areas for a cleaner appearance . 6. Tidy and Adjust Once all cables are in the tray, adjust their positions to ensure they are flat and evenly spaced. Use additional Velcro ties or clips inside the tray to prevent cables from shifting over time . 7. Optional Enhancements

• Use decorative cable covers to match your office aesthetic.

• Consider wireless devices to reduce the number of cables.

• For power strips or chargers, a cable management box inside the tray can keep everything contained and organized . By following these steps, you can achieve a clean, professional look on a glass desk or panel while keeping cables secure, protected, and easily accessible.
