How to make a triple cable management frame and its price

Overview

Shop for electronics, apparel, mobile phones, beauty products & more online from the overseas market at low prices in India.

Key Takeaways

You can build a triple cable management frame using wood or aluminum, cable clips, and a custom frame design, with estimated costs ranging from $50 to $200 depending on materials and complexity.Materials and Tools Needed
• Frame Material: Birch plywood, pine, or aluminum sheets for a sturdy structure .

• Cable Routing Components: Cable clips, ties, and channels to separate three sets of cables .

• Tools: Miter saw, drill, screwdriver, measuring tape, pencil, sandpaper, and optionally a CNC machine for precise cuts .

• Optional Finishing: Paint, varnish, or LED lighting for aesthetics .
Step-by-Step Construction
• Design the Frame: Sketch a 3D layout of your frame, ensuring three separate channels or compartments for the cables .

• Measure and Cut: Measure the dimensions of your cables and workspace. Cut the frame material to size, leaving space for cable routing and access .

• Assemble the Frame: Use screws or brackets to assemble the frame. Ensure each compartment is clearly separated for the three cable groups .

• Install Cable Management Components: Attach cable clips or channels inside each compartment to hold cables securely .

• Finishing Touches: Sand edges, paint or varnish the frame, and optionally add LED lighting for visibility and style .
Price Estimate
• Wooden Frame: $30–$80 for plywood or pine, plus $10–$20 for screws, clips, and ties.

• Aluminum Frame (CNC-cut): $100–$200 depending on sheet thickness and CNC service costs .

• Optional Accessories: LED strips, paint, or varnish may add $10–$30. Total Estimated Cost: $50–$200 depending on material choice, complexity, and optional features.
Tips for a Triple Cable Setup
• Label each compartment for easy identification.

• Keep power cables separate from data cables to reduce interference.

• Ensure the frame is accessible for maintenance or adding new cables.

• Consider modular designs if you plan to expand your setup in the future . By following these steps, you can create a functional and visually appealing triple cable management frame tailored to your workspace needs.
