Fiber Optic Sensor FC-D1

Overview

Ultra-small diameter fibers with a compact head ensure precision centering accuracy to stably detect minute parts. Sensing of minute objects can be performed by combining the fiber and spot lens. 6 times longer sensing range than conventional models! Reflective type FD-R35G has been added. It has reasonable pricing while. Fiber Optic Sensors are available at Mouser Electronics. F&C has gone through many years of development and struggle since its establishment, and now it has broken through 5000 single products, which are widely used in intelligent manufacturing of mobile phones, packaging machinery, plastic machinery and other. Fiber optics with Built-In Indicators now allow for a quick status or alignment check by simply looking at the fiber head.
