Fiber optic cable cabling tools

Overview

Amazon.com: Fiber Optic Cable ToolsGlobal Recycled Standard (GRS) certified products contain recycled content that has been independently verified at each.

Key Takeaways

Fiber optic cabling requires specialized tools for installation, splicing, testing, and cleaning to ensure optimal network performance and reliability.Installation Tools

Fiber optic installation begins with proper cable preparation and layout. Essential tools include:

• Cable Strippers and Jacket Removal Tools: Remove outer jackets without damaging the fiber inside .

• Kevlar Shears: Cut Kevlar strength members cleanly to prevent fraying .

• Fiber Cleavers: Produce precise, perpendicular end faces for splicing; critical for minimizing insertion loss. Desktop cleavers like the AFL Fujikura CT-30 achieve cleave angles under 0.5° and handle thousands of cleaves, while handheld cleavers are suitable for field repairs but require more skill .

• Hand Tools: Screwdrivers, pliers, wrenches, and saws are often needed for general cable handling and installation .
Splicing and Termination Tools

Splicing ensures a seamless optical path, while termination prepares fibers for connectors:
