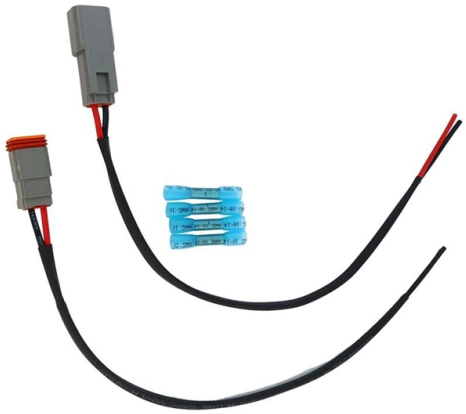
Length of FRP cable tray



Overview

FRP Cable Tray Sizes and Specifications | Complete GuideExplore FRP cable tray sizes and specifications, including types, widths, resin grades, load rating.

Key Takeaways

FRP cable trays are available in a wide range of sizes, typically varying in width from 50 mm to 600 mm, with lengths around 2 to 3 meters, and are offered in ladder and perforated types for different load and cable management requirements.

Types of FRP Cable Trays

Ladder Type Cable Trays

Constructed with two longitudinal side rails and multiple rungs for support. Ideal for heavy-duty applications and multiple cable runs. Provides excellent ventilation and heat dissipation.

Commonly used in industrial plants, offshore platforms, and chemical facilities.

Perforated or Channel Type Cable Trays

Solid bottom with pre-drilled holes and integral side rails. Suitable for light loads, instrumentation, and control cables. Often used in residential, commercial, and sensitive electronic installations.

Standard Sizes

Width: Typically ranges from 50 mm to 600 mm, depending on the manufacturer and application requirements.

Height/

Depth: Usually between 50 mm and 150 mm for ladder rungs or channel depth. Length: Standard lengths are 2 meters or 3 meters, which can be joined using coupler plates or splice plates. Customization: Many manufacturers offer custom widths, heights, and lengths to suit specific project needs, including bends, tees, reducers, and cross sections.

Accessories and Covers

Covers: Flat or peaked covers are available to protect cables from dust, moisture, and mechanical damage. Peaked covers help shed snow or debris in outdoor installations. Fittings: Coupler plates, expansion plates, angle plates, hold-down clamps, and trefoil clamps are used to connect and secure trays.

Material Properties: FRP trays are lightweight, corrosion-resistant, UV-resistant, halogen-free, and flame-retardant, making them suitable for harsh environments. ApplicationsFRP cable trays are widely used in: Chemical and petrochemical plantsOffshore and onshore platformsPower plants and substationsWater treatment and metallurgical plantsCommercial and residential buildings In summary, FRP cable trays come in various widths, heights, and lengths, with ladder and perforated designs to accommodate different cable loads and environmental conditions. They are highly customizable and supported by a range of accessories for secure and efficient cable management.
