How much does indoor fiber optic cable typically cost

Overview

If purchasing just the cable, it can cost about $0.20 to $1 per foot when purchased in bulk, which is usually more than 500 feet.

Key Takeaways

Indoor fiber optic cable typically costs between $1 and $6 per foot at retail, with wholesale prices ranging from $0.09 to $1.52 per foot depending on type and specifications.Material Costs

The cost of indoor fiber optic cable varies based on fiber type, strand count, and jacket construction. Single-mode fiber (OS2) is generally less expensive per foot than multimode fiber (OM3/OM4), but multimode is preferred for high-speed, short-distance applications like data centers or office networks. Retail prices for indoor cables range from $1 to $6 per foot, while bulk or wholesale purchases can cost $0.09 to $1.52 per foot. A simple 1-core FTTH drop cable may cost around $0.13 per foot, whereas a 288-strand backbone cable can reach $6 per foot. Pre-terminated cables and patch cords are more expensive due to factory termination and connector type .

Installation Costs

If you include installation, costs increase depending on cable length, labor, and complexity. For indoor runs, labor rates typically range from $0.60 to $3.00 per foot, with additional costs for connectors, patch panels, and permits. A basic 1,000-foot indoor single-mode run with minimal termination may total $2,650–$3,100, including materials and labor. Larger or more complex projects, such as multi-story buildings or high-strand-count cables, can significantly increase total costs .

Factors Affecting Price
• Fiber Type: Single-mode vs multimode; multimode is more expensive for high-speed applications.

• Strand Count: More strands increase material cost.

• Jacket Type: Plenum-rated or LSZH jackets for indoor safety add to cost.

• Pre-Termination: Factory-terminated cables reduce labor but increase material cost.

• Project Size: Longer runs and multiple drops increase total cost.

• Local Labor Rates: Urban areas may have higher installation costs than suburban or rural locations .
Summary

For indoor fiber optic cable alone, expect $1–$6 per foot retail or $0.09–$1.52 per foot wholesale. Including installation, a typical indoor project can range from $2,500 to $7,000 depending on cable length, fiber type, and labor complexity. Choosing pre-terminated cables can reduce labor costs but increases upfront material expenses. Proper planning of fiber type, strand count, and installation method is essential to optimize both performance and budget .
