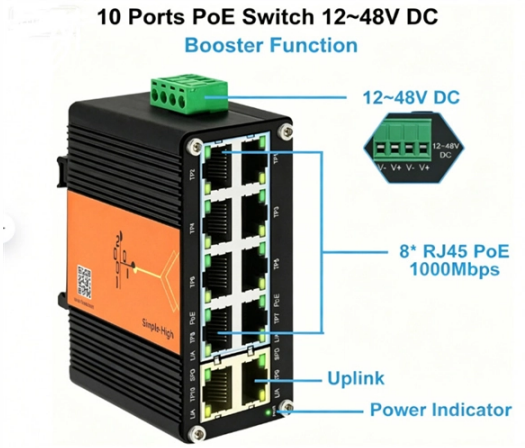
Price of Optical Cable Identification Signs for High Voltage Lines



Overview

Amazon.com: Buried Cable SignCheck each product page for other buying options. OSP Fiber Cable Warning Tapes, Signs, Posts & Labels – Tagged. Buried dete.

Key Takeaways

Optical cable identification signs for high voltage lines typically range from $10 to $200 per unit, depending on size, material, and installation type.Overview of Products and Pricing

Overhead High Voltage Line Markers: These markers are designed for visibility on transmission lines and can be installed on live lines. Sizes range from 12" to 36" aluminum markers, with lightweight options like the 36" marker weighing only 20 lbs. Prices vary based on material and voltage rating, with basic ABS or acrylic markers starting around $50–$100, while specialized EHV markers for lines up to 500 kV can cost $150–$200 per unit . Warning Signs for High Voltage Cables: Standard outdoor warning signs, such as those sold by SafetySign.com, are more affordable, typically $10–$30 per sign, with discounts available for bulk orders or online sign-up promotions . These signs are suitable for construction zones, utility corridors, and areas where workers need to be cautioned about overhead electrical lines. Fiber Optic and OPGW Cable Markers: For optical ground wire (OPGW) or fiber optic lines, high-visibility markers, ID sleeves, and posts are available. Prices for these markers vary depending on size, material, and whether they are indoor or outdoor rated. Basic ID sleeves or warning posts can start at $10–$25, while more durable outdoor markers or posts may cost $50–$100 each . Buried Cable Markers and Warning Tapes: For underground optical cables, polyethylene warning tapes and buried cable markers are used. Rolls of visual warning tape typically cost $20–$40 per 9-yard roll, while rigid buried cable markers may range from $15–$50 per marker, depending on size and material .

Factors Affecting Price

• Material: Aluminum, ABS, acrylic, or polyethylene affect durability and cost.

• Voltage Rating: Markers for higher voltage lines (up to 500 kV) are more expensive due to insulation and corona-resistant coatings.

• Installation Method: Helicopter or hot-line installation increases overall project cost.

• Customization: Custom legends, colors, or reflective coatings can add to the price.

• Quantity: Bulk orders often reduce per-unit cost.

Recommendation

For high voltage optical cable identification, it is advisable to consult suppliers like P&R Tech or FiberOptics4Sale to match the marker type with your line voltage, environmental conditions, and installation method. Requesting a quote ensures accurate pricing for your specific project requirements .
