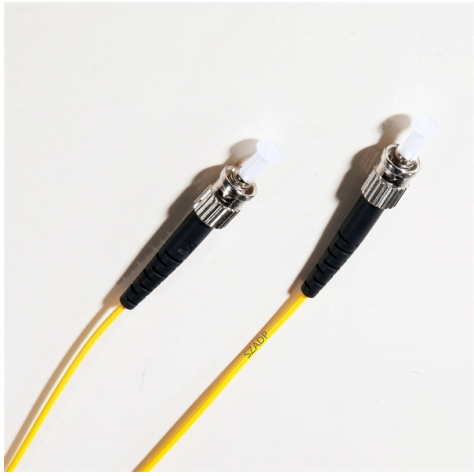
Price of Vertical Cable Tray Supports for External Walls



Overview

Cable trays Cable trays Cable tray, angle 90, T-piece, wall bracket, crossing, top customer service, top prices and fast delivery at Ekabel24.de High-quali.

Key Takeaways

Vertical cable trays for external walls typically range from $50 to $250 per meter, depending on material, type, and load capacity.

Factors Affecting Price

Material: Hot-dip galvanized steel is common for outdoor use due to corrosion resistance and durability, with prices generally starting around $50–$100 per meter for medium-duty trays and $120–$250 per meter for heavy-duty options. Stainless steel (304 or 316) offers superior corrosion resistance, especially in coastal or industrial environments, and can cost 1. 5–2 times more than galvanized steel.

PV

C or halogen-free plastic trays are lighter and weather-resistant, typically priced lower ($40–$80 per meter), but may have lower load capacity. Tray Type: Ladder trays are ideal for heavy power cables and provide strong support, generally at the higher end of the price range. Wire mesh or basket trays are lighter, easier to install, and suitable for data or control cables, often mid-range in cost.

Single rail or solid perforated trays are used for specific routing needs and can vary widely in price depending on size and material. Size and Load Capacity: Widths typically range from 50mm to 600mm, with longer lengths (1–3 meters) increasing cost. Heavy-duty trays designed for high cable loads or industrial applications are more expensive than light-duty trays for smaller installations.

Accessories and Installation: Couplers, bends, risers, and lids are additional costs, often $5–$30 per piece depending on material and size. Outdoor installation may require brackets, wall mounts, and corrosion-resistant fasteners, which add to the overall project cost. Typical Price RangesLight-duty galvanized steel: $50–$80 per meterMedium-duty galvanized steel: $80–$120 per meterHeavy-duty galvanized steel: $120–$250 per meterStainless steel trays: $150–$400 per meterPVC trays: $40–$80 per meter For accurate pricing, it is recommended to request quotes from suppliers such as CEF, RS Components, Direct Channel, or Bahra Electric, specifying the tray type, material, length, and intended load.

This ensures compliance with standards like DIN EN 61537 and suitability for external wall installations.
