Price of auxiliary sockets for distribution boxes

Overview

Get free shipping on qualified Meter Sockets products or Buy Online Pick Up in Store today in the Electrical Department.

Key Takeaways

Auxiliary sockets for distribution boxes typically range from $15 to $150 per unit, depending on type, amperage, and enclosure features.Overview of Pricing
• Standard Wall or Schuko Sockets: Single 230 V Schuko or 16 A CEE sockets for indoor/outdoor use are available in pre-wired distribution boxes, with prices starting around $15–$30 per socket for basic models suitable for construction or light industrial use (Amazon, RoadEu) .

• Combination or Industrial Sockets: Distribution boxes with multiple sockets, including 16 A and 32 A CEE sockets, can cost $50–$150, depending on the number of outlets, amperage, and IP rating for weatherproofing .

• Custom Auxiliary Power Distribution Boxes (APDBs): For industrial or solar applications, APDBs with multiple circuits, fuses, and monitoring systems can be custom-priced, often starting around $100–$200 and increasing with additional features like circuit breakers, robust enclosures, or high-current ratings .
Factors Affecting Price
• Amperage Rating: Higher current sockets (32 A or above) are more expensive than standard 16 A sockets.

• Number of Sockets: Boxes with multiple outlets or mixed socket types cost more due to additional wiring and components.

• Enclosure Type: Weatherproof (IP44–IP67) or impact-resistant enclosures increase the cost.

• Pre-Wired vs Modular: Pre-wired boxes ready for immediate connection are generally more expensive than modular or DIY assembly options.

• Brand and Certification: European or industrial-grade brands with CE, UL, or IEC certifications may carry a premium price.
Where to Buy
• Online Marketplaces: Amazon, IndiaMART, and Reichelt Elektronik offer a range of auxiliary sockets and distribution boxes with transparent pricing .

• Specialized Suppliers: Industrial suppliers like Distribution Zone provide high-current, IP-rated boxes for professional applications, often with custom configurations . In summary, basic auxiliary sockets start around $15, while fully equipped industrial distribution boxes with multiple high-current sockets can reach $150 or more, depending on specifications and features.
