Slovakia CIF Price for 10G SFP Optical Modules

Overview

Here comes the question, which 3rd-party optical transceiver manufacturer is reliable to buy the best priced SFP?

Key Takeaways

The typical CIF price for 10G SFP+ modules in Slovakia ranges from approximately $20 to $300 per unit, depending on module type, brand, and transmission distance.Price Overview

10G SFP+ modules vary widely in price based on optical type, reach, and brand. Short-range (SR) modules for multi-mode fiber are generally at the lower end, around $20–$60, while long-range (LR/ER) single-mode modules can cost $100–$300 or more per unit . Branded OEM modules from Cisco, Juniper, or HPE are typically priced higher due to warranty, support, and vendor lock-in, whereas compatible third-party modules offer cost savings with similar performance .

Factors Affecting CIF Pricing
• Transmission Distance and Technology: SR modules (up to 300m) are cheaper, LR modules (10–40 km) cost more due to single-mode optics and higher precision components . CWDM or DWDM modules for specialized applications can further increase costs.

• Brand and Vendor: OEM-branded modules carry a premium, while multi-source compatible modules are more affordable .

• Volume and Procurement Channel: Bulk orders reduce per-unit cost. CIF pricing includes shipping and insurance to Slovakia, which may add $5–$20 per module depending on logistics and supplier location.

• Module Features: Digital diagnostics (DOM), temperature range, and laser type (EML vs VCSEL) influence pricing .
Example Slovakia-Specific Module

A CWDM 10G SFP+ module with 20 km reach over single-mode fiber is available from Slovak distributors, typically priced in the $80–$150 range per unit, excluding shipping and insurance . Adding CIF costs for delivery to Slovakia would bring the total closer to $90–$170 per module, depending on supplier and shipping terms.

Practical Guidance
• For data center or enterprise deployment, compatible SR modules are cost-effective for short distances.

• For backbone or long-distance links, LR or CWDM modules are recommended despite higher cost.

• Always confirm supplier CIF terms, including insurance coverage and delivery time, to ensure accurate budgeting. In summary, expect CIF prices for 10G SFP+ modules in Slovakia to range from $20–$300, with most standard enterprise modules falling between $50–$150 per unit, depending on type, brand, and distance .
