TP Core Switch Ear

Overview

Mount your TP-Link TL-SG1024 switch cleanly in a standard 19-inch rack with these replacement rack ear brackets.

Key Takeaways

The Zing Ear TP Core Switch, such as TP-01 or TP-05, is a touch-sensitive lamp control module that allows you to turn lights on/off and adjust brightness levels by touching a conductive surface.Overview

The TP Core Switch from Zing Ear is a touch-sensitive module designed for table lamps, bedside lamps, and other indoor lighting fixtures. It replaces traditional mechanical switches and enables Low, Medium, and High brightness control with a simple touch on the lamp's metal body or base . These modules are compact, easy to install, and compatible with standard 120V AC incandescent lamps .

Key Models
• TP-01 / TP-01F: Allows 3-way dimming (Low-Medium-High) and on/off control. It is suitable for indoor lamps and can be installed without modifying the lamp structure .

• TP-05: Similar functionality with touch-sensitive operation, designed to restore or upgrade lamps that no longer respond to touch. It supports three brightness levels and is ideal for metal-base lamps .
Features
• Touch Activation: Any conductive surface of the lamp can act as a switch.

• 3-Way Dimming: Cycle through Low, Medium, and High brightness settings.

• Easy Replacement: Direct replacement for existing touch modules without rewiring.

© 2026 ALFA PRO COMMUNICATION SYSTEMS (Pty) Ltd - All rights reserved

• Compact Design: Small form factor fits most table lamps.

• Indoor Use: Rated for standard indoor incandescent lamps, typically 150W at 120V AC .
Installation and Usage
• Turn off power and unplug the lamp.

• Remove the old switch module if present.

• Install the TP module by connecting the wires to the lamp socket according to the included instructions.

• Test the touch function by touching the lamp's metal surface to cycle through brightness levels. These modules are widely available online through platforms like eBay and AliExpress, often priced affordably and shipped worldwide .
Benefits
• Restores touch functionality to non-responsive lamps.

• Eliminates the need for mechanical switches.

• Provides smooth dimming control without additional dimmer hardware.

• Compact and cost-effective solution for lamp repair or upgrade. In summary, the Zing Ear TP Core Switch is a versatile, touch-sensitive module that enhances lamp usability, offering simple on/off control and adjustable brightness for indoor lighting fixtures .
