

Busbar Protection Cabinet Price

Overview

Our Bus Bar Cabinet offers exceptional quality within the Kitchen Cabinets category. For cheap kitchen cabinets at factory direct prices, compare multiple OEM and distributor quotes.

Key Takeaways

Busbar protection cabinets typically range from \$200 to over \$2,000 depending on size, current rating, and features.

Price Range and Factors

The cost of a busbar protection cabinet varies widely based on several factors:

- Size and Dimensions:** Cabinets come in multiple heights, widths, and depths, with larger enclosures costing more due to increased material and space for busbars and terminals.
- Current Rating:** Cabinets designed for higher current ratings (e.g., 250 A or more) require thicker copper or aluminum busbars and more robust insulation, increasing the price.
- Material and Construction:** Enclosures made from industrial-grade steel or aluminum with IP65 or higher ratings for dust and water protection are more expensive.

Accessories and Features: Transparent covers, integrated ventilation, earth and neutral bars, and modular mounting options can add to the cost.

Compliance and Standards: Cabinets meeting international standards such as BSEN 60439-1 or designed for photovoltaic or industrial applications may carry a premium.

Typical Price Examples

Small, basic enclosures for low-current applications: approximately \$200–\$500. Medium-sized industrial cabinets with IP65 rating and multiple busbar terminals: approximately \$500–\$1,200. Large, high-current or specialized cabinets with advanced features and compliance certifications: \$1,500–\$2,500 or more.

Where to Buy

Busbar cabinets can be sourced from industrial suppliers and electronics distributors such as DirectIndustry, Rittal, Eaton via MISUMI, Mouser Electronics, and CEF. Many suppliers offer configurable options, CAD data, and fast delivery, which can influence the final price. When budgeting, consider not only the cabinet cost but also installation, busbar fittings, and any additional safety accessories required for your electrical system.
