

C600 Symmetrical Optical Module

Overview

ZXA10 C600 is a large-capacity optical access OLT device based on the TITAN platform. It can meet the needs of ultra-high bandwidth access, 4k/8K big video and VR, fixed mobile convergence, network reconstruction, and carrier-grade QoS and security guarantees. The ZTE C600 is a cutting-edge Optical Line Terminal (OLT) designed for modern fiber-optic. y Optical Line Terminal-to-the-Home (FTTH), Fiber-to-the-Bu key features like Type B/C protectThis white paper provides a comprehensive, deep-dive technical analysis of the ZTE GFGN 16-port GPON subscriber board, specifically engineered for the flagship ZXA10 C600 series OLT. Understanding the capabilities of the GFGN board is critical for network architects aiming to maximize port density. ZXA10 C600 is a large-capacity optical access platform, it has the leading-edge industrial design, state-of-the-art architecture, and full scenarios coverage. It has fully-distributed and programmable router architecture to support 4K/8K/VR, FMC, SDN/NFV/virtualization as well.
