Cable tray auxiliary pulley width 18

Overview

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

A typical cable tray auxiliary pulley with a width of 18 cm is designed for durability, smooth cable movement, and high load capacity, often made from stainless steel or metal.Specifications and Features
• Width: Approximately 18 cm, suitable for standard cable tray systems .

• Material: Stainless steel or durable metal, ensuring corrosion resistance and long-term use .

• Load Capacity: High load-bearing capability, designed to handle heavy cables safely during installation .

• Design: Equipped with an adjustable clamp to prevent cable snagging and allow smooth tension control .

• Dimensions: Commonly around 18 x 15 x 2 cm, with slight variations depending on the manufacturer .

• Weight: Typically 212–227 g, making it lightweight yet sturdy for construction and renovation projects .

• Applications: Ideal for electrical installations, wire pulling, and renovation projects, adaptable to various environments .
Additional Considerations
• Durability: Thickened base and wear-resistant materials ensure operational safety even in harsh conditions .

• Ease of Use: Smooth rolling and adjustable tension make it easier to guide cables through trays without damage .

• Compatibility: Works with standard cable trays and can accommodate different cable diameters, making it versatile for multiple installation scenarios . This type of auxiliary pulley is widely available from suppliers like Amazon and OnBuy, and it is recommended to check the exact dimensions and load ratings to ensure compatibility with your specific cable tray system .
