

Cable tray price and cable tray

Overview

Cable Tray Price List 2025: Current Market Rates Find the latest cable tray price list for 2025. Compare B2B and B2C pricing, materials, and supplier optio.

Key Takeaways

Cable tray prices range from \$2 to \$25 per meter, depending on material, type, size, and finish. Price Range by Material and Type Galvanized Steel: Most common, balances durability and cost, suitable for general industrial use. Prices are moderate and widely available.

Stainless Steel: Offers excellent corrosion resistance, ideal for corrosive or hygienic environments, but is the most expensive option. Aluminum: Lightweight and rust-proof, slightly more expensive than steel, reduces installation weight and support requirements. Plastic/PVC: Budget-friendly, resistant to impact and weather, suitable for light loads and wet areas, but not ideal for heavy cables.

Tray Types and Cost Implications: Ladder Trays: Strong, support heavy cables, higher cost.

Wire Mesh/

Basket Trays: Lightweight, cheaper, ideal for data or small cables. Perforated Trays: Moderate cost, good ventilation, easier installation. Coating and Finish Hot-Dip Galvanized (HDG): Thick zinc coating, highly durable outdoors, higher upfront cost.

Powder Coating: Protects against wear, available in colors, moderate cost.

Pre-

Galvanized (PG): Thin zinc layer, cheaper, suitable for dry indoor areas.

Installation and Additional Costs

Labor: Skilled workers and regional wage differences affect total cost. Equipment and Energy: Cutting, welding, and finishing add to expenses. Shipping: Heavier trays cost more to transport.

Project Savings: Using cable trays instead of conduit can save 40–60% of total project costs due to faster installation and easier cable placement.

Summary

For budgeting purposes, expect \$2–\$25 per meter, with the lower end for plastic or wire mesh trays and the higher end for stainless steel ladder trays with HDG coating. Material choice, tray type, coating, and installation environment are the main cost drivers. Bulk orders and careful selection of tray type can significantly reduce overall project costs.
