

Companies that mass-produce optical modules

Overview

Explore 1,296 top manufacturers and suppliers of Optical Components in our comprehensive photonics buyers' guide.

Key Takeaways

Leading companies that have mass-produced optical modules include Innolight, Eoptolink, Accelink, Hisense Broadband, HG Genuine, Source Photonics, Coherent (Finisar), Cisco (Acacia), Marvell, and Intel. Chinese Manufacturers

- Innolight (Zhongji Innolight Co., Ltd.): A global leader in datacom optical modules, Innolight produces high-speed modules including 100G, 200G, 400G, and 800G. It has achieved batch delivery of 800G and coherent modules, serving major cloud vendors like Meta, Google, and Amazon .
- Eoptolink: Focused on high-performance optical modules for data centers, telecom networks, and smart grids, Eoptolink has a wide product portfolio and serves over 300 customers globally .
- Accelink: Specializes in optical communication modules and has mass production capabilities for high-speed modules used in telecom and data center applications .
- Hisense Broadband: Engaged in R&D and production of optical communication products, supplying international markets including North America, Europe, and Asia .
- HG Genuine: Produces optical modules for various networking applications and has established mass production lines .

- Source Photonics: Although partially foreign-owned, it is considered a Chinese optical module manufacturer with mass production capabilities .

International Manufacturers

- Coherent (formerly Finisar): Produces a wide range of optical modules, including high-speed coherent and pluggable modules, serving both telecom and data center markets .

- Cisco (Acacia): Manufactures optical modules for long-haul and metro networks, with large-scale production for global telecom infrastructure .

- Marvell: Provides high-speed DSP chips and SerDes technologies integrated into optical modules, supporting 400G and 800G production .

- Intel: Previously mass-produced silicon photonics pluggable optical modules, selling millions of units before divesting part of its optical module business .

Key Insights

These companies have achieved large-scale production of optical modules to meet the growing demand from data centers, cloud computing, AI clusters, and 5G networks. Chinese manufacturers, led by Innolight, have increasingly dominated the global market, while international players like Coherent, Cisco, and Intel continue to supply high-performance modules for specialized applications . The mass production of optical modules spans multiple data rates, including 100G, 200G, 400G, and 800G, and supports applications in telecommunications, enterprise networks, and hyperscale cloud infrastructure.

Frequently Asked Questions

What does an optical transceiver do?

Optical modules are mainly packaged by optoelectronic devices TOSA/ROSA, functional circuits and optoelectronic interface components. The optical t...

What is the optical module industry chain?

The upstream industry of optical modules mainly includes optical chips, optical components and optical devices, and the downstream industry mainly...

Who are the main manufacturers and suppliers in the optical module industry chain?

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut elit tellus, luctus nec ullamcorper mattis, pulvinar dapibus leo.

Top 10 Optical Module Manufacturers' Annual Reports ...

The only domestic company simultaneously possessing mass production capabilities for a full range of high-speed

10 companies in the optical transceiver industry chain 2024

To help you choose the best partner, this article will analyze and introduce 10 companies in the optical transceiver

Chinese Optical Modules Own 7 of the Top 10 Seats. So Why Are

Innolight and Eoptolink are estimated by industry sources to supply roughly 60% of NVIDIA's 800G volume, controlling

LIGENT Inc.

With dual strengths in optical-module and optical-chip R&D and mass production, LIGENT stands among the few companies

Top 10 Optical Module Brand & Manufacturers

Find the Top 10 Optical Module brand, manufacturers, and exporters. Get the contact details and addresses of companies producing

Source Photonics: Leading Global Manufacturer of Optical Transceivers

Our technical expertise in R&D runs deep with manufacturing process development expertise and highly specialized engineering

Optopax | Custom AI Cameras Modules & Optical Solutions

Whether you need custom embedded AI camera modules, precision optics, or integrated assemblies, our team transforms complex

Optical Components | Suppliers | Photonics Buyers' Guide | Photonics ...

Explore 1,296 top manufacturers and suppliers of Optical Components in our comprehensive photonics buyers' guide.

Optical Transceiver Market: Top 10 Manufacturers Ranked

Optical transceiver market leaders: the top 10 manufacturers powering 400G and 800G modules for hyperscale data

OEM Manufacturing

Optopax offers comprehensive OEM manufacturing services for custom optics and imaging solutions—spanning individual lens

ASML | The world's supplier to the semiconductor industry

ASML gives the world's leading chipmakers the power to mass produce patterns on silicon,

Top 100 Optical Component Manufacturers in 2026 | ensun

A. Optical Components company | Optical Components Manufacturer. Optical Components Manufacturer of precision optics

Top 10 Optical module manufacturers in the World 2025

Are you curious about which optical module manufacturers stand out in today's competitive market? Understanding the top factories

Top 10 Leading Companies in the Global Optical Transceiver Market

Accelink Technologies is a leading provider of optical communication devices, specializing in the design,

Top 24 Optical Materials Companies

Top 24 Optical Materials Companies 1. Edmund Optics Website: edmundoptics
Ownership type: Private Headquarters:

What types of listed companies manufacture optical module chips?

Optical module chips are key components in the optical communication industry, playing a major role in high-speed

Latest Ranking Of Top 10 Global Optical Module Suppliers

Recently, LightCounting, a well-known market research organization in the optical communication industry, released

10 Best Fiber Optic Manufacturers for 2026

The Build America, Buy America Act requires that optical fiber and fiber-optic cable be domestically manufactured—a

Acacia

High-speed coherent optical interconnect products that transform communications networks, relied upon by network

Top 24 Optoelectronic Devices Manufacturing Companies

Top 24 Optoelectronic Devices Companies 1. OSI Optoelectronics Website: osioptoelectronics Ownership type: Private

Source Photonics to Expand Optical Chip and Module Production

The company has established mass-production capabilities in EML lasers and high-speed optical modules, and its

Best 10 Optical Transceiver Manufacturers in the United States (2025 ...

The ten companies below either design and ship branded pluggable transceivers, supply high-volume optical modules

United States Optoelectronics Companies

Mordor Intelligence highlights the top companies of United States Optoelectronics and provides details on leaders as well as major
