

Correct Price for Sealing Distribution Boxes

Overview

Order additional seals here! This Polylok 6" Seal is designed for use with Polylok Boxes #3017-206 & #3017-207.

Key Takeaways

Standard sealing for distribution boxes typically ranges from \$5 to \$50 per seal, depending on type, size, and material.

- Pipe Seals (Polylok)
- Designed to create a watertight connection between pipes and distribution boxes.
- Available for 2", 3", 4", and 6" pipe sizes.
- Can be cut to size for custom applications .
- These seals are generally affordable, often in the range of \$5-\$15 per seal, depending on size and supplier.
- Foam Gaskets (Polyurethane or Silicone)
- Used for sealing the grooves of plastic or metal distribution boxes.
- Applied via CNC-controlled dosing machines for precision and compliance with IP/NEMA standards .
- Polyurethane foam (FERMAPOR K31) and silicone foam (FERMASIL) provide high resilience (>95-97%) and long-term sealing performance .

- Pricing for these high-precision foam gaskets is higher, typically \$20–\$50 per box, depending on box size, complexity, and whether automated application is used.

Factors Affecting Price

- Material: Silicone foams are generally more expensive than polyurethane due to higher temperature resistance and durability.
- Box Size: Larger distribution boxes require more sealant material, increasing cost.
- Application Method: Pre-cut pipe seals are cheaper than custom CNC-applied foam gaskets.
- Environmental Requirements: Outdoor or harsh-environment boxes may require higher-grade seals, slightly increasing cost .

Summary

For standard distribution boxes:

- Small pipe seals: \$5–\$15 each
- Foam gaskets for larger boxes: \$20–\$50 per box These prices are indicative and may vary by supplier, region, and specific technical requirements. For exact pricing, contacting suppliers like Polylok or Sonderhoff with box specifications is recommended .
