

Fiber Optic Cable Tester for Communication Equipment

Overview

When you need to test fiber optic cables in the field, you'll want a tester that handles multiple functions without slowing you down.

Key Takeaways

Fiber optic cable testing equipment includes OTDRs, visual fault locators, power meters, and fiber identifiers, essential for installation, troubleshooting, and certification of fiber networks. Key Types of Fiber Optic Test Equipment

1. Optical Time Domain Reflectometers (OTDRs) OTDRs are used to measure fiber length, attenuation, and locate events such as splices, connectors, bends, or breaks.

They generate a graphical trace of the fiber's performance, helping technicians identify faults and high-loss areas. Key specifications include dynamic range, event dead zone, and wavelength support (1310/1550 nm for single-mode, 850/1300 nm for multi-mode). Professional models like the Fluke QUAD OTDR or AFL FlexScan FS300 offer bidirectional analysis, SmartAuto testing, and LinkMap visualization for large deployments, saving time and reducing callback rates.

2. Visual Fault Locators (VFLs) VFLs inject visible light into the fiber to quickly identify breaks, bends, or poor connections. They are ideal for continuity checks and basic troubleshooting.

Affordable VF

LPens are available for \$20–50, while professional models provide enhanced visibility and fault detection. 3. Optical Power Meters and Light Sources These tools measure optical power and signal loss (insertion loss) across fiber links.

They are essential for verifying that fiber installations meet industry standards. Some certification testers, like the Fluke CertiFiber Pro, integrate power meters and light sources for both single-mode and multi-mode fibers, and specialized PON meters detect split signals at 1390/1490/1550 nm. 4.

Fiber Identifiers Fiber identifiers detect active traffic on a fiber without disconnecting it, indicating signal direction and approximate power levels. They are non-disruptive and useful for live networks. Models from AFL, Exfo, and Jonard range from \$200–\$500, providing reliable detection for maintenance and troubleshooting.

5. Integrated Network Testers For mixed-media environments, devices like the NetAlly LinkRunner AT or Fluke LinkRunner combine fiber, copper, and WiFi testing. They verify link integrity, PoE, and network speed, making them versatile for enterprise deployments.

Testing Methods

Visible Light Source Testing: Quick fault identification using a VFL or fiber flashlight. Ideal for detecting breaks or bends but does not measure signal loss.

One-

Jumper Method (Power Meter & Light Source): Measures signal attenuation accurately, comparing results against TIA/EIA standards for connectors and splices.

OTD

R Testing: Provides detailed event mapping and troubleshooting for complex or long-haul fiber installations. Useful for inaccessible or high-loss fibers.

Additional Tools and Accessories

Inspection Probes and Cameras: Check connector endfaces for contamination or damage. Cleaning Kits: Maintain fiber endface cleanliness, preventing the most common cause of network outages. Reporting Software: Cloud- or PC-based tools document test results and manage workflow efficiently.

Summary

Effective fiber optic testing requires a combination of OTDRs, VFLs, power meters, fiber identifiers, and integrated testers. Selection depends on the network type, deployment scale, and required accuracy. Professional-grade equipment offers advanced features like bidirectional OTDR analysis, automated testing, and detailed reporting, while budget-friendly tools provide essential functionality for smaller or less complex networks.

Consistent testing ensures network reliability, reduces downtime, and verifies compliance with industry standards.

7 Best Fiber Optic Cable Testers That Pro Technicians

When you need to test fiber optic cables in the field, you'll want a tester that handles multiple functions without slowing you down. You can choose

Fiber optic testers | Fluke

Fluke Networks has a wide range of Fiber Optic testing products to help certify that power losses are within standards and to troubleshoot broken and high loss links on single-mode and multimode fiber

Fiber Optic Test & Installation Equipment | Fiber Testing

Shop fiber optic test and installation equipment, including OTDRs, OLTS certifiers, fusion splicers, and fiber cable assemblies for professional network work.

FiberOptics

Fiber Optic products. We carry Fiber Optic fusion splicers, cleavers, OTDRs, cables, panels, laser sources, power meters, and many other Fiber Optic products for

Network test, monitoring and analytics experts | EXFO

We're the communications industry's test, monitoring and analytics experts. Pioneering essential solutions and technologies for over 35 years

The FOA Reference For Fiber Optics

Fiber Optic Network Design Jump To: The Communications System Cabling Design
Choosing Transmission Equipment Planning The Route Choosing Components Cable
Plant Link Loss Budget

AAATesters Fusion Splicers, OTDRs, Cable Testers, Certifiers, CATV ...

AAATesters Sells Refurbished Fusion Splicers, OTDRs, Cable Testers, Certifiers, CATV
Meters, Site Master, Scopemeters, Models-Ericsson, Fitel, Fujikura, Sumitomo ...

Optical Fibre & Network Communications Specialist | AusOptic

Professional tools and PoE solutions by an optical fibre and network comms specialist. Laser systems, fusion splicers, test equipment and photonics.

Fiber Optic Equipment & Broadband Materials | Millennium

Millennium supplies fiber optic cable, OSP materials, and equipment rental for broadband network builders. 20+ U.S. locations. Talk to a fiber build expert.

Global Leader in Materials, Networking, and Lasers

Markets Datacenter and Communications Datacenter Enable ultra-high-speed data transmission and optimized power efficiency for hyperscale and enterprise

Global IT Products & Network Solutions Provider | Black Box

Black Box provides cutting-edge IT solutions and technology products to businesses worldwide, ensuring innovative and reliable services for global digital transformation.

WebProcure

WebProcure offers best-in-class functionality, reaching end-to-end from requester to procurement buyer to merchant, and all the way back! Designed specifically for the public sector.

Online Bulk Cable Company | CableWholesale

As a premier online bulk cable company, CableWholesale carries a large inventory of computer cables, USB, HDMI, fiber optic, VGA cables, and more. Shop now!

Fiber Optic Cable Supply | Buy Fiber Optic Products from The Most ...

Connectors & Adaptors Innerduct Conduit - Corrugated & Smoothwall Test Equipment
THE BEST SOURCE FOR FIBER OPTIC CABLES & NETWORKING SOLUTIONS If you're looking for fiber

Optical Communications Products

Browse our optical communication connectivity products designed to help you enable your communication networks. Easily create a bill of materials list.

Network Cable Testers | Fluke

Maximize performance and uptime with Fluke Network Cable Testers. Ideal for new installations, troubleshooting, or testing Ethernet and fiber optic cables.

Handheld Fiber Optic Test Equipment

Handheld fiber optic test equipment. Cable and optical test solutions for enterprise, service provider and industrial networks. Manufactured in Australia

Test Equipment Cable Testers

L-com offers a wide selection of fiber optic cable testers and test equipment to support fiber installation and maintenance requirements. Standard and application-specific test instruments are available,
