

Firewall connection to dual-core switch

Overview

We are using the switch so we can connect both firewalls to the same two ISP's. There is a VLAN for each ISP set up on the switch.

Article Content

Single firewall connect to 2 core switches

Yes, firewall will create an aggregation port and assign an ip address, and connect to 2x layer 2 switches (Cisco 2960), which is access port, then the bottom core switch will create interface

How to Connect Cisco switch for two firewalls

We are using the switch so we can connect both firewalls to the same two ISP's. There is a VLAN for each ISP set up on the switch. There are

Splitting a single ISP line through a core switch to 2 firewalls best ...

You have a single point of failure by connecting the single ISP line into a single switch (even if it is stacked) which is then breaking out to two firewalls. Not the worst thing in the world but ideally this

Best Practices

You could also use a modular switch for your core with two power supplies, two controllers, and redundant cooling and pretty much head off the major failure points on your core

Core layer | FortiSwitch 7.6.0 | Fortinet Document Library

With 8x100-GbE QSFP28 slots per FortiGate unit, it provides enough capacity to directly connect with 2x100-GbE ports to each of the two core FortiSwitch units at a nonstop forwarding capacity of up to

Routing on firewall or core switches? : r/networking

In my research I'm getting mixed suggestions - Some say that core switches are for routing, when others say that core switches have to be as fast as possible and have minimal tasks dedicated to them.

Network Design: Dual ISP, DMZ, and the Network Edge

Perhaps you'd have a detailed diagram for the VPC of the 2 switches, also a detailed diagram of the core network to the firewalls before it reaches the DMZ showcasing those interfaces

PA-Aggregate-Group-Configuration-Dual-Uplink-Core-Switch

This single core switch is now getting replaced by 2 Huawei core switches, both in active-active mode. We have tested the 1 up-link scenario to firewall and is working as expected.

Solved: Firewall to 2 core switches

Look at this picture and tell me, is it possible to add another core switch and have them wired to firewall so, that it could improve availability (fault

ISP Hooked Up to Core Switch First... Instead of Straight to ...

They've just pinched some ports on the core switch to use as an intermediary switch between you firewall/router, it's a simple way of splitting your incoming connections to serve two firewalls without
