

High-density edge data centers from Belgian suppliers

Overview

Edge Data Center in Ghent | High-Density, Carrier-Neutral, and Supporting densities from 2-7 kW per rack and up to 50+ kW with rear door cooling, the center.

Key Takeaways

Belgium hosts several high-density edge data centers from local suppliers, offering carrier-neutral connectivity, AI-ready infrastructure, and Tier 3-4 facilities. Key Belgian Suppliers

- nLighten: Offers edge data centers with high-density cabinet hosting, strong connectivity, and on-site services to support IT environments efficiently .
- DCstar: Operates six strategically located datacenters in Flanders, including a Tier IV certified facility, providing energy-efficient and flexible colocation solutions suitable for high-density workloads .
- LCL Data Centers: Runs five independent facilities with a focus on carrier-neutral solutions, sustainability, and energy efficiency, supporting high-density IT equipment .
- Cegeka: Provides high-availability datacenters that support hybrid cloud models, Infrastructure-as-a-Service (IaaS), and managed services, suitable for AI and high-density applications .
- Max. Eusip Bvba: Specializes in dedicated server solutions and colocation services, supporting advanced technologies for high-density deployments .

Market Trends and Advantages

Belgium is emerging as a European hub for edge and high-density data centers due to several factors :

- **Connectivity:** Brussels offers carrier-dense subsea connectivity, while nationwide fiber expansion supports high-bandwidth applications.
 - **Energy and Cost Efficiency:** Flanders provides below-average industrial electricity tariffs, and municipal incentives for heat reuse help offset grid costs.
 - **AI and High-Density Demand:** Rapid AI adoption is driving higher power density requirements, favoring upgrades from Tier 3 to Tier 4 designs.
 - **Edge Deployment:** Medium-sized edge facilities are growing faster than large-scale sites, enabling sub-5 millisecond latency for AI inference workloads.
 - **Strategic Locations:** Urban and rural rollouts are supported by joint-venture funding, making edge locations viable across Belgium.
- Industry Support

The Belgian Digital Infrastructure Association (BDIA) promotes leading companies in the digital infrastructure ecosystem, providing insights into market growth, energy efficiency innovations, and the strategic importance of Belgian data centers .

Summary

Belgium offers a robust ecosystem of high-density edge data centers from local suppliers like nLighten, DCstar, LCL, Cegeka, and Max. Eusip Bvba. These facilities provide carrier-neutral connectivity, Tier 3-4 certifications, energy-efficient operations, and AI-ready infrastructure, making Belgium an attractive location for enterprises seeking edge computing and high-density colocation solutions.
