How much does a micro-module server rack cost in Namibia

Overview

Network Server Racks for sale in Windhoek, Namibia New and used Network Server Racks for sale in Windhoek, Namibia on Facebook Marketplace. Find great deal.

Key Takeaways

A micro-module server rack in Namibia typically costs between $3,000 and $15,000 USD, depending on size, power, and features.

Estimated Pricing

Micro modular data centers, which include pre-built server racks with integrated power, cooling, and monitoring, vary in cost based on capacity and configuration. Small units suitable for offices or retail branches (around 18U, 3 kVA) can start at approximately $3,000–$5,000 USD, while larger units for high-demand environments (27–31U, 6–10 kVA) may range from $10,000–$15,000 USD or more. Custom setups with weatherproofing, redundancy, or higher power capacity will increase the price further.

For individual server racks without integrated micro data center features, costs are lower. Basic open-frame racks can start at $200–$500 USD, while fully enclosed, cooled, and secure racks may cost $1,000–$2,500 USD. These prices are influenced by rack height, cooling options, and security features.

Local Availability in Namibia

Namibia has suppliers offering modular and customizable racks, often used for retail or small IT setups. Companies like Micro Sheet Crafts provide modular racks with high-grade steel construction, customizable sizes, and on-site consultation to match business requirements and budgets. While exact pricing requires a direct quote, these suppliers can provide free estimations and professional support for deployment.

Factors Affecting Cost

Rack Size and Capacity: Larger racks with more U-space and higher power capacity cost more. Cooling and Power Backup: Integrated AC systems or UPS units increase upfront costs. Security and Enclosure: Lockable, fire-resistant, or shock-proof racks are more expensive.

Customization and Delivery: Local suppliers may charge for on-site installation or custom dimensions. Total Cost of Ownership: Micro modular data centers save on long-term energy and maintenance costs compared to traditional setups. In summary, for a small-scale micro-module server rack in Namibia, expect to pay $3,000–$15,000 USD depending on configuration, while standalone server racks can be significantly cheaper.

Contacting local suppliers for a tailored quote is recommended to get precise pricing and delivery options.
