

How much is a 50mm cut in a cable tray

Overview

Cut Cable Tray Costs: 22% Savings Blueprint for Developers This guide is written for developers, EPC contractors, and project managers responsible for comm.

Key Takeaways

The rate for a 50 mm pre-galvanized aluminum perforated cable tray is approximately ₹150 per meter, while mild steel ladder trays require a quote from suppliers. Aluminum Cable Trays Pre-galvanized aluminum perforated cable trays with a width of 50 mm are available at around ₹150 per meter in Greater Noida, Uttar Pradesh, India, as per Deep Enterprises. These trays are lightweight, corrosion-resistant, and suitable for both horizontal and vertical mounting, making them ideal for office, industrial, or data center installations.

Mild Steel Cable Trays

Mild steel industrial ladder cable trays of 50 mm width are also available, but pricing is typically provided on request. Suppliers like Mahavir offer GST invoices and trade credit options, and the final rate depends on bulk orders and delivery location. Mild steel trays are more robust and suitable for heavy-duty applications.

Factors Affecting Price

Material: Aluminum is lighter and corrosion-resistant; mild steel is stronger but heavier. Tray Type: Perforated, ladder, or solid-bottom trays affect cost. Length and Thickness: Standard lengths are 1 meter; thickness ranges from 1 mm to 3 mm for aluminum.

Location and Supplier: Prices vary by region and supplier policies.

Additional Considerations

For accurate sizing and load capacity, use a cable tray fill calculator to ensure compliance with NEC or IEC standards, which recommend a maximum fill of 40% for power cables and 50% for control/signal cables. This ensures proper ventilation and prevents overheating. For bulk purchases or specific project requirements, it is recommended to request a quote from suppliers to get the most accurate and up-to-date pricing.
