

How to convert fiber optic cable to dedicated line

Overview

A media converter is a simple device that sits between the fiber optic cable and the Ethernet cable., LC, SC) matches the port. In this blog post. This guide provides a comprehensive overview of how to choose the right equipment, correctly install fiber and network cables, and optimize network settings to ensure reliable and efficient connectivity. This allows you to connect devices that use different types of cabling, such as a computer. These include FTTC for fiber to the curb, also called FTTN or fiber to the node, FTTH for fiber to the home and FTTP for fiber to the premises, using "premises" to include homes, apartments, condos, small businesses, etc. Recently, we've even added FTTW for fiber to wireless. The drawing below defines the network: a "feeder" cable extends from the OLT (optical line terminal) in the CO (central office) to a FDH (fiber distribution hub) where the PON (passive optical network) splitter is housed.
