

Huawei ODF fiber optic equipment

Overview

Optical distribution frame (ODF) Optical distribution frame (ODF) The FIU2117/FTU2114 can be installed in 19 inch or 21 inch integrated cabinets with depth.

Key Takeaways

Huawei ODFs are high-density optical distribution frames designed for efficient fiber management, protection, and network scalability in telecom and data center environments.

Overview

Huawei Optical Distribution Frames (ODFs) serve as the central hub for fiber splicing, termination, patching, and cable protection in modern optical networks, ensuring structured management and scalability for dense fiber deployments. They are essential for telecom operators, data centers, and enterprise networks, providing organized routing, stress relief, and bend-radius compliance for optical fibers.

Key Models and Specifications

Huawei offers a range of ODF models, including the FIU2117/FTU2114 series and the ODF-24-SC-E2000-Duplex LC: FIU2117/FTU2114 Series: Can be installed in 19-inch or 21-inch cabinets with a depth of ≥ 300 mm. These models support fiber termination and integrated splicing, with variants such as FIU2117-48-SC/APC, FTU2114-48-SC/APC, FIU2117-96-4LC/APC, and FTU2114-96-4LC/APC. ODF-24-SC-E2000-Duplex LC: An empty chassis designed for high-density fiber management, supporting 24 SC ports.

It organizes and protects fiber connections, reduces signal loss, and enhances network performance. **Features and Benefits**
High-Density Fiber Management: Supports multiple fiber terminations and splicing in a compact frame, suitable for growing network demands. **Cable Protection:** Ensures proper routing, bend-radius compliance, and stress relief to prevent fiber damage.

Scalability: Modular design allows easy expansion and integration with existing optical networks. **Compatibility:** Works with Huawei's optical transmission systems and supports various connector types (SC, LC, E2000) for flexible deployment. **Enhanced Network Performance:** By organizing fiber connections efficiently, Huawei ODFs reduce signal loss and improve overall network reliability.

Support and Documentation

Huawei provides comprehensive support guides, manuals, datasheets, and digital tools for ODF products, including installation instructions, troubleshooting insights, and product lifecycle information. Users can access these resources through Huawei's official support portal for detailed technical guidance.

Applications

Huawei OD

ODFs are widely used in: Telecom networks for structured fiber management and splicing. Data centers to support high-density fiber connections and scalable network architecture. Enterprise networks and smart-building infrastructures requiring organized optical cabling and future-proof expansion.

Huawei OD

ODFs combine robust design, high-density capacity, and compatibility with advanced optical systems, making them a reliable choice for modern fiber optic network deployments.
