

Indoor fiber optic cable company

Overview

See if fiber internet is available in your area. Enter your zip code or address to see which fiber providers offer fiber service in your area.

Key Takeaways

Top indoor fiber optic cable providers include Corning, Prysmian Group, Sumitomo Electric, Furukawa Electric (OFS), and TS Cables, all offering high-quality solutions for data centers, offices, and residential networks.

Leading Manufacturers and Suppliers

1. Corning Incorporated – A global leader in fiber optics, Corning produces advanced indoor fiber optic cables, patch cords, and connectivity systems suitable for data centers and enterprise networks. Their products include single-mode and multimode cables, bend-insensitive fibers, and high-density solutions for indoor installations, ensuring low-loss performance and reliability .
2. Prysmian Group – Known for optical fibers and fiber-optic cables, Prysmian offers indoor-rated cables for commercial and residential applications. Their solutions support high-speed data transmission and are widely used in structured cabling projects across North America, Europe, and Asia .
3. Sumitomo Electric Industries – Provides indoor fiber optic cables optimized for office networks and data centers. Their products include multimode and single-mode options, with a focus on durability and ease of installation in indoor environments .

4. Furukawa Electric / OFS Optics – Offers a range of indoor fiber optic solutions, including OM4/OM5 multimode cables for short-distance data center runs and single-mode cables for enterprise networks. Their products are designed for high-density and low-latency applications .

5. TS Cables – Specializes in practical indoor fiber optic solutions for small to large-scale networks. TS Cables provides reliable, easy-to-install cables and connectivity systems for offices, homes, and data centers, meeting common industry standards .

Other Notable Providers

- Hengtong Optic-Electric – Offers indoor-rated fiber cables for commercial and residential networks .
- CommScope – Supplies structured cabling and indoor fiber solutions for enterprise and data center environments .
- LS Cable & System – Provides indoor fiber optic cables with high performance and compliance with international standards .
- Sterlite Technologies (STL) – Manufactures indoor fiber optic cables for enterprise and telecom applications .

Considerations for Indoor Fiber Optic Cables

- Cable Type: Single-mode for long-distance indoor runs; multimode (OM4/OM5) for short-distance, high-speed data center connections .
- Bend-Insensitive Fibers: Reduce signal loss in tight indoor spaces.
- Compliance: Look for BEAD or local standards for government or commercial projects .
- Installation Services: Some companies, like TS Cables and OFS, also provide installation support, splicing, and testing for indoor networks .

These companies represent reliable options for indoor fiber optic cabling, offering products and services that support modern high-speed networks in offices, data centers, and residential environments.
