Installation of Saudi Arabian Aluminum Alloy Cable Management Frame

Overview

WESCOSAWescosa designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from.

Key Takeaways

Aluminum alloy cable management frames in Saudi Arabia provide lightweight, corrosion-resistant, and durable support for electrical and communication cables, with installation guided by international standards and site-specific structural requirements.

Overview of Aluminum Alloy Cable Management Systems

Aluminum cable trays, trunking, and runways are designed to support and organize electrical cables efficiently while reducing clutter and potential hazards. Aluminum is preferred for its lightweight properties, corrosion resistance, and ease of installation, making it ideal for harsh environments such as desert or coastal regions in Saudi Arabia. These systems are available in various sizes, profiles, and lengths, including standard lengths of 2.

44m, 3. 0m, and 3. 66m, and can be customized to meet specific project requirements.

Materials and Design Considerations

Aluminum Alloy: Lightweight, corrosion-resistant, and suitable for outdoor and industrial environments. Profiles: Options include ladder-type, channel-type, and box-shaped rungs, with ventilated or solid bottoms for airflow and cable protection. Load Capacity: The tray design, rung spacing, and material thickness (commonly 1.

5mm or 2. 0mm) determine the load-bearing capacity. Accessories: Fittings, bends, tees, reducers, and couplers allow flexible routing and expansion.

Structural Support and Installation

Proper support framing is critical to ensure the stability and longevity of the cable management system. Key points include: Supports & Brackets: Use wall brackets, C-profile supports, or trapeze-type channels to span between structural beams. Spacing: Support hangers are typically spaced according to load requirements and standards such as NEMA VE 1 & VE 2 and IEC 61537.

Installation Method: Aluminum trays are lightweight, allowing faster installation and easier modifications without welding. Trays can be field-cut to fit site-specific lengths. Environmental Considerations: Aluminum's corrosion resistance ensures durability in high temperatures, UV exposure, and humid or coastal conditions common in Saudi Arabia.

Compliance and Standards

Installation should comply with international standards to ensure safety and performance: NEMA VE 1 – 2009: Metal cable tray systemsNEMA VE 2 – 2006: Installation guidelines for metal cable traysIEC 61537: Cable tray and ladder support systems Best PracticesPlan the layout: Map cable routes, bends, and junctions before installation. Select appropriate tray type: Ladder, channel, or trunking based on cable type and load. Ensure proper support: Use brackets and trapeze supports to prevent sagging.

Allow for expansion: Include couplers and adjustable fittings for future cable additions. Verify load ratings: Ensure tray thickness and rung spacing meet project load requirements. Regular inspection: Check for corrosion, loose fittings, or misalignment, especially in outdoor installations.

By following these guidelines, aluminum alloy cable management frames can provide efficient, durable, and flexible cable routing solutions suitable for industrial, commercial, and infrastructure projects in Saudi Arabia.

BMC Bakriya Metal – Bakriya Industry

BAKRIYA METALWORKS COMPANY (BMC), is a Professional Cable Management Production Facility based at the Jeddah Industrial Area, and a member of the Ahmad Al Amoudi Group & BMC Cable

Cable Tray System in Saudi Arabia | Heavy Duty Cable Trays Supplier

Engineered with durability, adaptability, and ease of installation in mind, our systems cater to various requirements, ensuring seamless cable management for any project.

Cable tray

Cable tray ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia.

Adhwa Al-Rawafid Electric Industries

Adhwa Al-Rawafid Electric Industries is a leading manufacturer of cable management products and accessories, our innovative and quality products have been serving the industrial process for 18 years.

ElectroLink Ltd. Saudi Arabia

Linkstrut metal framing systems, from Linkstrut channels and its various channel combinations and channel accessories to the different type of hardwares are known for its versatility, it makes

CABLE MANAGEMENT SYSTEMS CABLE TRAYS & ACCESSORIES

We manufacture a wide range of products capable of providing the characteristics which respond to the proposed application, along with quality of assembly, speed of installation, and cost-saving cable trays.

12-SDMS-06

This SEC Distribution Material Specification requirements for design, materials, manufacturing, indoor/outdoor Metallic Cable Tray System, intended to be used in the distribution network of the

CABLE TRAY

SFSP Cable Management Systems are designed to meet most requirements of cable and electrical wire installations and comply to local and international standards of fabrication and finishing.
