

Intelligent Corrugated Bushing for Fiber Optic Cables in Local Area Networks

Overview

Corning's ActiFi composite fiber optic cable is a hybrid powered fiber cable that brings data and power to the edge of your network.

Key Takeaways

Intelligent corrugated bushings protect fiber optic cables in LANs while supporting high-performance, scalable, and safe network deployments. Function and Design

Intelligent corrugated bushings serve as entry points for fiber optic cables into enclosures, racks, or distribution frames, providing mechanical protection and strain relief. The corrugated design allows for flexibility and controlled bending, reducing stress on the fiber and minimizing signal loss. These bushings are often used in structured cabling systems to maintain the integrity of high-bandwidth LANs and can be integrated with plug-in connectors for easy installation and maintenance .

Applications in LANs

In Local Area Networks, these bushings are critical for fiber-to-the-edge (FTTE) and backbone cabling. They support both single-mode and multimode fibers, enabling high-speed data transmission over short and medium distances within enterprise buildings, campuses, or data centers . Intelligent bushings can also be part of long-reach solutions, allowing fiber connectivity beyond traditional 100-meter limits while maintaining power delivery and network reliability .

Benefits

- **Mechanical Protection:** Prevents fiber breakage and microbending, ensuring signal quality.
- **Fire Safety Compliance:** Compatible with plenum (OFNP) and riser (OFNR) rated cables, meeting local building codes .
- **Scalability:** Supports modular LAN architectures, allowing easy expansion or upgrades without disrupting existing infrastructure .
- **Integration with Intelligent Systems:** Can work with media converters, intelligent power units, and monitoring systems to optimize network performance and remote management .
- **Reduced Optical Loss:** Corrugated design maintains minimum bend radius, reducing attenuation in high-density or tight-space installations .

Implementation Considerations

When deploying intelligent corrugated bushings in LANs, consider:

- **Cable Type:** Single-mode for long-distance, multimode for short-distance high-bandwidth applications .
- **Bend Radius:** Ensure bushings maintain the fiber's minimum bend radius to prevent signal degradation .
- **Environmental Protection:** For hazardous or flameproof areas, select bushings compliant with EN 60079-0 standards .
- **Network Architecture:** Align bushing placement with backbone and horizontal cabling plans to optimize connectivity and future scalability .

Conclusion

Intelligent corrugated bushings are essential components in modern LANs, providing mechanical protection, fire safety compliance, and integration with intelligent network systems. They enable high-performance fiber optic deployments, support scalable network growth, and ensure reliable data transmission across enterprise and campus environments .

Best Innerduct and Protective Solutions for Fiber Optic Cables

The RiteAV conduit is a 1-1/4" corrugated innerduct designed for outdoor Ethernet or fiber runs. It includes a pull string

Telecommunication Pipes

Available in multi-color options for easy identification, these pipes are ideal for both indoor and

Amphenol Network Solutions > Simplify your fiber cable raceway and ...

Two-Inch split tube, often called corrugated tubing, is used for vertical cable management, typically directly into cabinets or network

Corrugated Innerduct, Riser/ Plenum – Fiber Savvy

With its superior flexibility, crush resistance, and temperature regulation properties, the corrugated fiber

Fiber Optic Cables for Local Area Networks

OPTRAL manufactures cables for LAN both in a tight-buffered structure to offer a flexible, light and quick connecting cable; as well as

Outdoor and Campus Cables

The steel-armor is easily removed with an internal ripcord, leaving a fully functional intact DX-Series Distribution riser-rated inner

Long-Reach Fiber Technology for Enterprise Networks

Our Long-Reach Technology offers a streamlined architecture that can adapt to future needs and grow

Ideal Electrical Suppliers Limited

With access to over 53,000+ electrical products online, Ideal supplies everything from everyday essentials

How To: Install Fiber Optic Cable for Success –

Learn the best practices for installing fiber optic cable, from patch cords to bulk distribution

ActiFi Composite Fiber Optic Cable

Corning's ActiFi composite fiber optic cable is a hybrid powered fiber cable that brings data and power to the edge of your network.

Intelligent Transportation System (ITS) | Smart

Fiber optic technology is revolutionizing the transportation industry by enabling faster, more reliable

Fiber Optic Local Area Network (Fiber LAN) Solutions

A local area network, or LAN, is a geographically limited network intended for the local transport of voice,

LAN Solutions: Building Backbone Infrastructure | Optical ...

Corning offers the most comprehensive and innovative line of fiber optic solutions for in-building applications that are available at

B-Series Breakout

Inner cable is a fully functional B-Series Breakout riser-rated cable High-performance components and construction Most rugged and

LAN Solutions: Building Backbone Infrastructure | Optical ...

The building fiber optic backbone is the pillar of your in-building network. It requires higher-bandwidths, at greater distances as it

Turning Fiber into a Sensing System: The Magic of Fiber Optics Sensing

Imagine a world where the Internet doesn't just connect but senses—detecting earthquakes, monitoring battery health,

How to Choose the Right Conduit for Your Fiber Optic Installation

The conduit protects the fragile fiber optic cables from environmental factors and physical damage, ensuring their longevity and

LSZH™ Loose Tube, Gel-Free, Corrugated Armored Cable

Corning LSZH™ loose tube gel-free cables are flame-retardant, indoor/outdoor, suitable for installation in interbuilding and

The FOA Reference For Fiber Optics

Fiber Optics and Premises Cabling Fiber Optic Architecture For Local Area Networks (LANs) It's fairly obvious that fiber optics is not

LAN Solutions: Building Backbone Infrastructure | Optical ...

The building fiber optic backbone is the pillar of your in-building network. It requires higher-bandwidths, at greater distances as it

Outside Fiber Optic Cable Design Considerations | Corning

The cable that started the fiber optic revolution in the 1970s was the loose tube configuration, which isolated the optical fiber from the

FOR Local Area Networks AND Data Centers

The right solution for your next local area network or data center project is at your fingertips! This Core Products List is all about

Fiber Optic Local Area Network (LAN) Solutions | Corning

What is a Fiber Optic Local Area Network (LAN)? A local area network, or LAN, is a geographically limited network intended for the

Local Area Network Solutions | Corning

A local area network, or LAN, is a geographically limited network intended for the local transport of voice, data, and video. Often

Optical Fibre Infrastructure

In modern networks, the interswitch links are typically derived from an optical fiber infrastructure. This is becoming so even within

Optical fibre bushings

Description The optical fibre bushing is used as an optical fibre cable entry into flameproof enclosures located in hazardous areas.
