

Ivory Coast Solution Low Power Optical Module OSFP

Overview

The OSFP-XD DR8+ module combines state-of-the-art 200G per lane optical technologies and industry-leading digital signal processing techniques. 6Tbps of transmission speed over 2km distance at a low power consumption of less than 23W over 0-70C temperature. As illustrated below, the LPO modules retain only the driver and transimpedance amplifier (TIA), each incorporating continuous-time linear equalization (CTLE) and equalization (EQ) capabilities to compensate for high-speed signal impairments. This linear pluggable optics design offers several. OSFP-XD MSA Rev 1. and a disclaimer is added to the Other Documents section. 22:.. The OSFP MSA is proud to introduce OSFP1600 and OSFP-XD to the industry. This whitepaper highlights the key aspects and features of each solution with the expectation that both solutions will have a place in future data center applications. 6T optical modules are, the major module types involved, and the application scenarios driving adoption. Figure 1: Side View Comparison of OSFP-IHS vs OSFP-RHS What Is OSFP-IHS (Integrated Heat Sink)?

OSFP-IHS is the standard and most widely deployed OSFP thermal solution.
