Low-Temperature Resistant Battery Storage Cabinet Exported by Sweden CIF Price

Overview

Battery Cabinet Robur Safe 7.5The Robur Safe 7.5 Battery Cabinet protects lives, property, and business operations with certified safety according to VDMA.

Key Takeaways

Sweden offers advanced low-temperature resistant lithium-ion battery storage cabinets with high safety standards, but CIF pricing depends on supplier, quantity, and shipping destination.

Product Overview

Swedish manufacturers, such as MBG Sweden, provide lithium-ion battery cabinets designed for safe storage and charging of batteries used in power tools, e-bikes, and industrial applications. These cabinets comply with the VDMA 24994: 2024 standard, ensuring fire resistance, protection against internal explosions, and alarm systems for temperatures exceeding +50°C. Cabinets are available in multiple sizes and are engineered for both indoor and outdoor use, with robust insulation and safety features.

Some models, like the LithiumSafe™ Battery Box, offer extreme thermal resistance (up to 2552°C), fire-resistant vents, and optional active ventilation systems for cooling during charging. These features make them suitable for low-temperature environments and harsh operational conditions.

Export and CI

F Pricing ConsiderationsCIF pricing includes the cost of the product, insurance, and freight to the destination port. For Swedish battery storage cabinets, the CIF price is influenced by: Cabinet size and energy capacity: Larger cabinets with higher kWh ratings cost more to manufacture and ship. Safety and certification standards: Compliance with VDMA 24994 or other international standards may increase cost.

Shipping logistics: Distance, port fees, and insurance premiums affect the final CIF price. Quantity and customization: Bulk orders or custom branding may reduce per-unit cost but increase initial investment. To obtain an accurate CIF price, it is recommended to contact Swedish suppliers directly, such as MBG Sweden, and provide details including destination port, quantity, and any required customization.

Swedish Market Context

Sweden has recently expanded its battery storage infrastructure, with large-scale projects totaling 211 MW/211 MWh deployed by companies like Ingrid Capacity in partnership with BW ESS. This demonstrates Sweden's expertise in high-quality, reliable energy storage solutions suitable for export.

Summary

Swedish low-temperature resistant battery storage cabinets are highly safe, modular, and suitable for industrial and commercial applications.

While CI

F pricing is not publicly listed, it depends on cabinet specifications, shipping distance, insurance, and order volume. Direct supplier engagement is necessary to obtain precise CIF quotations.
