

Monaco Bimetallic Coated Cable Tray Unit Price

Overview

Cable Tray Price List | Electrical Works Cable tray are used in wiring of buildings to support electrical cables and wires that are used to distribute power.

Key Takeaways

The unit price for Monaco Bimetallic Coated Cable Trays typically ranges from \$10 to \$25 per meter, depending on material, coating, and order quantity.

Price Overview

The cost of bimetallic coated cable trays, such as those used in industrial or commercial projects, depends on several factors: material type, surface coating, tray size, and supplier. Bimetallic coatings enhance corrosion resistance, making these trays more durable than standard pre-galvanized trays, which increases the price compared to basic steel options. Material: Steel is the most common and cost-effective, while stainless steel or aluminum options are more expensive due to corrosion resistance and lightweight properties.

Coating: Hot-dip galvanization (HDG) provides superior outdoor durability but costs more than pre-galvanized or powder-coated finishes. Tray Type: Ladder trays are generally more expensive than perforated or wire mesh trays due to higher material usage and load capacity.

Typical Pricing

Per Meter: \$10–\$25 per meter for bimetallic coated trays, with bulk orders potentially reducing the cost by 20–40%. **Standard Lengths:** Most trays are produced in 3-meter or 6-meter lengths, with pricing often calculated per meter. **Fittings and Accessories:** Additional components like bends, tees, and couplers are priced per unit and can add to the total project cost.

Cost Influencing Factors

Installation Location: Outdoor or corrosive environments may require HDG or stainless steel, increasing the price. **Order Quantity:** Large-scale projects can negotiate lower per-meter rates. **Labor and Shipping:** Skilled installation and delivery logistics can significantly affect the total cost.

For precise pricing, it is recommended to request a quotation from suppliers, providing the tray specifications, length, and quantity. This ensures an accurate unit price tailored to your project requirements.
