

Nationwide AC Remote Power Supply Remote Unit

Overview

The NPS-01 allows AC powered equipment to be turned on, off, or power cycled from any remote PC, through any network connection. It works well using either a local LAN network or from anywhere in the world using the Internet. Depending on the scale of this system, the load could be a couple feet from the source, or thousands of meters away. This article will discuss what remote power systems are, how they work, and options. Remote Source delivers comprehensive AC remote control solutions that keep your cooling systems running efficiently year-round. 5kVA to 6kVA with either Manual. Control by 24V remote control or by switch in safe. Check each product page for other buying options. Price and other details may vary based on product size and color. PDUs are a tool for selectively.
