

Nepal Fiber Optic Cable Single Mode

Overview

Buy Ziasys Optical Fiber Cable 1 Core 100m (Z-OFLCX/F100) with single-mode fiber and 1310/1550 nm wavelength support.

Key Takeaways

Single-mode fiber optic cables in Nepal are widely available for high-speed, long-distance data transmission, with SC, LC, and SCAPC connectors commonly used for FTTH, FTTB, and FTTx networks. Overview of Single-Mode Fiber Optic Cables

Single-mode (SM) fiber optic cables are designed for long-distance and high-bandwidth transmission, using a small core (typically 9 μm) that allows only one light mode to propagate. This minimizes signal loss and dispersion, making them ideal for telecommunications, internet backbones, CATV, and data networks. SM cables are available in simplex (single core) or multi-core configurations, and can be used both indoors and outdoors depending on the cable type.

Common Connectors

- SC (Subscriber Connector): Standard connector with a push-pull design, widely used in telecom and FTTH networks.
- LC (Lucent Connector): Smaller form factor, often used in high-density patch panels.
- SCAPC (Angled Physical Contact): Angled polished connector that reduces back reflection and improves performance over long distances, ideal for high-speed networks.

- UPC (Ultra Physical Contact): Standard polished connector with low insertion loss, suitable for general SM applications .

Applications

Single-mode fiber optic cables in Nepal are used for:

- FTTH (Fiber to the Home), FTTB (Fiber to the Building), and FTTP (Fiber to the Premises) networks
- Long-distance data transmission in telecom and enterprise networks
- CATV and video transmission
- Optical test instruments and photoelectric control systems

Local Availability in Nepal

Several suppliers provide single-mode fiber optic cables and accessories:

- Daraz Nepal: Offers SC-SC simplex SM patch cords and outdoor drop cables with low insertion loss and high return loss .
- ITShop Nepal: Sells outdoor single-mode fiber optic cables (GYXTC8Y) priced per meter .
- Platforms Hub: Provides a range of fiber optic infrastructure and accessories from leading brands .
- Mystore Nepal: Offers 3M SC-SC single-mode simplex patch cords with home delivery .
- Ubuy Nepal: Supplies LC-SC single-mode patch cables (OS1 9/125 μm) suitable for FTTH and FTTB systems .

Key Considerations

- Outdoor vs. Indoor: Outdoor-rated cables have additional protection against weather and UV exposure, while standard SM cables are primarily for indoor use .
 - Connector Type: Choose SCAPC for long-distance, high-speed networks to reduce back reflection; UPC or standard SC connectors are sufficient for shorter distances .
 - Cable Length and Core Count: Simplex cables are single-core, while multi-core cables support multiple connections in one sheath, useful for larger installations .
- Single-mode fiber optic cables in Nepal provide reliable, high-speed connectivity for both residential and commercial networks, with multiple options for connectors, lengths, and outdoor durability to suit various deployment needs .
