

Optical Communication Test Instrument Company

Overview

Pioneering Optical Instruments Santec has more than 45 years of experience designing and manufacturing fiber optic test systems.

Key Takeaways

Top suppliers of optical communication testing instruments include TRIOPTICS, Optikos, DataRay, GAOTek, Luna, and OZ Optics, offering a wide range of fiber optic and photonic testing solutions. Leading Suppliers and Their Offerings

TRIOPTICS (Germany) specializes in measurement and manufacturing systems for lenses, optical lens systems, and camera modules, providing instruments for quality control and optical metrology . Optikos offers standard and custom optical testing products, IQ Lab testing services, and engineering support for optical system development, focusing on advanced optical metrology and electro-optical design . DataRay Inc. develops laser beam analysis solutions, including beam profiling cameras, scanning slit profilers, and specialized accessories for precise laser characterization . GAOTek provides a comprehensive range of fiber optic test equipment, including OTDRs, optical fiber testers, fusion splicers, SFP transceivers, and CWDM/DWDM modules, suitable for field technicians, data centers, and telecom networks . Luna Innovations offers high-performance optical component analyzers, OBR reflectometers, polarization controllers, and emulation products for photonic integrated circuits, fiber network testing, and system characterization . OZ Optics (Canada) supplies fiber optic components, test equipment, polarization controllers, variable attenuators, and laser-to-fiber delivery systems, supporting both production and research applications .

Additional Suppliers and Resources

- Schaefter+Kirchhoff: Polarization-maintaining fiber optics, lasers, and inspection systems .
- NYFORS: Advanced glass processing and fiber splicing equipment .
- Nextrom: Production technologies for optical fibers and fiber optic cables .
- Global Communications / Teracomm: Laser diode drivers, dispersion compensation modules, and optical communications test products . These suppliers provide instruments for fiber optic cable testing, optical component characterization, polarization management, and photonic system development, covering both laboratory and field applications. Depending on your specific needs—such as high-precision lab testing, field splicing, or network performance evaluation—you can select from these vendors to obtain instruments that meet your technical and operational requirements.
