

PVC cable tray type

Overview

Basor PVC Cable Tray is a non-conductive, non-corrosive, lightweight and impact resistant cable management solution for the simple routing and support of power and data cables.

Key Takeaways

PVC cable trays are lightweight, non-conductive, corrosion-resistant systems designed for safe and efficient routing of electrical and data cables in various environments. Material PropertiesPVC cable trays are made from polyvinyl chloride, which makes them non-conductive, non-corrosive, and impact-resistant. They are suitable for environments where metal trays may corrode or conduct electricity, such as high-humidity areas, chemical plants, mining operations, and shorefront installations.

PV

C trays are also UV-resistant, making them suitable for outdoor applications, including solar/PV installations. They are lightweight, easy to cut, perforate, and join, which simplifies installation and reduces potential damage to cables. ApplicationsPVC cable trays are ideal for: Wet or humid environments where corrosion is a concernChemical or aggressive atmospheresOutdoor installations exposed to UV radiation or salt sprayUnderground or mining operations where non-conductive solutions are requiredSolar/PV installations requiring lightweight, durable cable management Sizes and ConfigurationsPVC cable trays are available in various widths, typically ranging from 100 mm to 400 mm, and come with pre-drilled fixing holes for quick installation.

Adjustable couplers allow orientation changes (up, down, left, or right) to suit installation needs. They can be mounted on walls, ceilings, or suspended from structures.

Installation Guidelines

Maintain a minimum distance of 250 mm between trays to ensure proper ventilation
Avoid running PVC trays under water, gas, or vapor pipelines
Use pre-drilled holes and adjustable couplers for secure and flexible installation
Ensure compliance with EN 61537 and other relevant standards for cable management
Advantages
Corrosion and chemical resistance ensures long-term durability
Non-conductive for electrical safety
Lightweight and easy to handle, reducing labor and installation time
UV-resistant for outdoor use
Versatile for a wide range of industrial, commercial, and utility applications
PVC cable trays provide a reliable, safe, and cost-effective solution for cable management in challenging environments, combining durability, flexibility, and compliance with international standards.
