Pigtail Jumper Accessories

Overview

High-performance, factory tested jumpers, pigtails, and trunk assemblies are available in a wide variety of interfaces and configurations.

Key Takeaways

Pigtail jumper accessories include fiber optic and RF/antenna jumpers, designed to connect devices, extend cables, or interface with network and wireless systems.

Fiber Optic Pigtail Jumpers

Fiber optic pigtails are short lengths of fiber cable with a connector on one end, used to connect active components like lasers, LEDs, or photodetectors to a network or to splice with longer fiber runs. Fiber jumpers (or patchcords) have connectors on both ends and are used to link devices or patch panels. They come in simplex, duplex, and multi-fiber configurations with standard connectors such as SC, LC, FC, or ST.

These accessories are widely used in telecom, datacom, and high-speed networking applications, and can be customized for length, fiber type, and connector type to meet specific network requirements ( ).

F and Antenna Pigtail JumpersRF pigtail jumpers are short coaxial cables with connectors on each end, commonly used to connect antennas to radios, base stations, or other wireless devices. They help prevent wear on chassis connectors, allow quick antenna changes, and support a wide range of wireless applications including WiFi, GPS, cellular, ham radio, VHF, UHF, CB, and RFID. Typical connectors include SO-239, PL-259, SMA, and Fakra, and cables like RG316 are often used for flexibility and durability.

These jumpers can be purchased in standard lengths or customized to fit specific setups ( ).

Key Considerations

Connector Type: Ensure compatibility with your devices (e.g., SC/LC for fiber, PL-259/SO-239 for RF). Cable Length: Choose appropriate lengths to minimize signal loss and maintain performance. Application: Fiber pigtails are for optical networks, while RF pigtails are for wireless or radio frequency systems.

Customization: Many suppliers offer custom lengths, hybrid connectors, or specialty fibers for unique requirements ( ).

Suppliers

Siemon: Offers high-performance fiber jumpers, pigtails, and trunk assemblies for networking ( ). Plugin Optics: Provides simplex, duplex, and multi-fiber jumpers with various connector options ( ). Berkshire Photonics: Specializes in custom fiber patchcords and pigtails for telecom and specialty applications ( ).

AIR802: Supplies RF and antenna pigtail jumpers for wireless applications with over 20,000 items available ( ).eBay/RF Cable Assemblies: Offers RF pigtail jumpers and adapters for ham radio and mobile antennas ( ). These accessories are essential for network connectivity, signal integrity, and flexible installation, whether in fiber optic networks or wireless communication systems.
