

Plug-in type non-pinch optical cable junction box

Overview

With the connectable junction boxes from OBO, electrical connections can be routed effectively and flexibly. This saves a considerable amount of time during installation.

Key Takeaways

A plug-in type non-pinch optical cable junction box is designed to protect fiber optic connections while allowing easy plug-in installation without damaging the fibers. Key Features
Non-Pinch Design: These junction boxes prevent fiber bending or pinching during installation, maintaining the minimum bend radius of optical fibers to avoid signal loss or damage. **Plug-in Connectivity:** Equipped with pre-installed adapters such as LC or SC connectors, the plug-in design allows quick and secure connection of fiber pigtails or distribution cables without splicing, reducing installation time.

Environmental Protection: Many models feature IP65 or higher ratings, providing dust and water resistance for indoor and outdoor applications. Sealing is achieved through cable glands that accommodate varying cable diameters while maintaining mechanical strength. **Capacity and Modularity:** Depending on the model, junction boxes can accommodate multiple splicing trays or adapter ports.

For example, compact boxes may hold 2-8 splicing cartridges or a combination of splice trays and distribution plates, supporting both small-scale and larger network deployments. **Materials and Durability:** Enclosures are typically made from robust materials such as ABS, polyamide, or GRP, offering mechanical strength, chemical resistance, and suitability for harsh industrial environments. **Installation Flexibility:** Some boxes feature quick-release fasteners, transparent lids for inspection, and compatibility with wall mounting or DIN rail systems, facilitating easy maintenance and network expansion.

Applications
FTTx Networks: Termination and distribution of fiber to homes or businesses. **Industrial Fiber Networks:** Harsh environments requiring robust protection and easy maintenance.

Indoor/

Outdoor Installations: Compact designs suitable for limited space or outdoor exposure. **Example Models**
MR398-JB Series: Supports Duplex LC or ST connectors, IP65 rated, accommodates varying cable diameters, and provides environmental sealing.

LAP

P Group Splice Box Compact: Offers plug-in LC-D APC adapters, pre-prepared pigtails, and removable splice trays for fast installation. These junction boxes ensure safe, reliable, and efficient fiber optic connections while minimizing the risk of fiber damage during installation and maintenance.

Fiber Optic Cable Joint Box

Fiber Optic Cable Joint Box Riteoptic fiber optic cable joint box provides optical, sealing and mechanical strength of the continuity between adjacent fiber optic

Fiber optic junction box, Fiber optic terminal box

Find your fiber optic junction box easily amongst the 64 products from the leading brands (HS, LAPP, Cahors, ...) on DirectIndustry, the industry specialist for your

Odf fiber terminal box ODF

The optical fiber terminal box is the terminal joint of an optical cable, one end of which is an optical cable, and the other end is a pigtail, which is equivalent to a device that splits an optical

GINTOOYUN Fiber Optical Terminal Junction Box,4-Port Fiber Panel Box ...

Applications: Suitable for FTTH, FTTO, FTTD and local area network. This optical fiber terminal box can place FC, LC adapters. 4-Port Optical Fiber Desktop Box used in the home or work area, the

Optical Fiber Joint Box

OPGW Optical Cable Metal Joint Box/Splice Closure/Joint Closure Joint Closure/Splice Closure/Joint Box is mainly used for protecting the fiber optic junction between two cables and reserve a section of

Fiber Optic Cable Splice Closure / Opgw Cable

Cable Joint Box is designed for splicing ADSS, OPGW cables and the normal cables, including two to four sleeves for input and output. Loose storage space makes

Junction box for optical fiber 8 port IP69

Fiber optic distribution box to be mounted on the wall. Made of gray plastic and with IP69 protection against dampness and suitable to be installed outdoors.
