

Price list for optical cable reel making machines

Overview

Optical Fiber Cable Making Machine Discover automatic optical fiber cable making machines for fiber optic cable production. Explore CE-certified Fiber Used.

Key Takeaways

The cost of fiber optic cable reel manufacturing machines ranges from \$750,000 to \$2,500,000 for a complete production line, depending on automation, capacity, and brand. Overview of Machine Types and Costs

Fiber optic cable production involves multiple specialized machines, including fiber drawing, coating, stranding, buffering, armoring, sheathing, and testing systems . The price of these machines varies based on:

- **Automation Level:** Fully automated lines reduce labor but increase initial investment. Semi-automatic or manual machines are cheaper but slower .
- **Production Capacity:** Machines capable of handling higher speeds or multi-fiber cables cost more. Typical coating and extrusion sections can reach up to 1000 meters per minute .
- **Brand and Origin:** European brands often cost 50-100% more than reputable Asian manufacturers, while Chinese suppliers offer competitive factory prices .

- Setup and Commissioning: Installation, training, and initial working capital add to the total investment .

Typical Price Ranges

- Complete Fiber Optic Cable Production Line: \$750,000 – \$2,500,000, covering all stages from fiber to finished cable .

- Individual Machines: Prices vary widely; for example, cable reel machines for winding and storing fiber optic cables can be purchased directly from manufacturers at factory prices, often ranging from a few thousand to tens of thousands of dollars depending on capacity and features .

Key Considerations

- Reel Capacity: Ensure the machine can handle the maximum reel diameter, width, and weight required for your production .
- Core Size Adjustment: Modern machines allow adjustable core diameters to accommodate different reel sizes .
- Operational Environment: Choose between electrically powered, air-powered, or mobile units based on your factory setup .
- Return on Investment (ROI): Most businesses achieve ROI within 18–36 months, depending on production volume and market demand .

Suppliers and Sources

- China-based Manufacturers: Offer competitive pricing and OEM/ODM options for cable reel machines .
- Global Suppliers: Companies like Rosendahl Nextrom provide complete fiber optic cable production solutions with advanced monitoring and quality control systems .
- Online Marketplaces: Alibaba lists a variety of cable reel machines suitable for different production scales and budgets . Investing in a fiber optic cable production line requires careful consideration of machine specifications, automation, and supplier reliability to ensure efficient production and long-term profitability.
