Price of Double-Layer Cable Tray Installation

Overview

On average, the cable tray installation cost per meter increases by approximately $10 to $30 per meter depending on the complexity of the installation and the labor rates in the area.

Key Takeaways

The price of double-layer cable tray connecting components typically ranges from $2 to $25 per meter, depending on material, type, and finish.

Pricing Overview

The cost of cable trays, including double-layer connecting trays, depends on several factors: Material: Hot-dip galvanized steel is common and moderately priced, stainless steel is more expensive due to corrosion resistance, aluminum is lightweight but pricier, and plastic trays are budget-friendly but less suitable for heavy loads. Type: Ladder trays, which support heavy cables, are more expensive than wire mesh or perforated trays. Double-layer or multi-tier trays may cost more due to additional material and complexity.

Length and Fittings: Standard cable tray lengths are usually 2. 4 meters, and connecting fittings are priced per piece.

Estimated Costs

Per meter: $2–$25 depending on material and type. Fittings/connectors: Typically sold per unit; prices vary by supplier and material. For example, galvanized steel connectors for ladder trays are on the higher end of the range.

Additional Considerations

Coating and Finish: Hot-dip galvanization increases durability and outdoor suitability but adds to cost. Powder-coated or pre-galvanized options may be cheaper but less durable. Bulk Orders: Large project orders can reduce per-meter costs.

Installation and Shipping: Heavier trays and fittings increase shipping costs, and labor costs vary by region. For precise pricing, it is recommended to request a quote from suppliers such as Ekabel24, RS Components, or McMaster-Carr, specifying the double-layer configuration, material, and length required. This ensures accurate cost estimates for your project.
