

Price quote for 48-core single-mode optical cable

Overview

"48 Core Single Mode Fiber Optic Cable" This guide highlights cost-saving order strategies and reliable distributor contacts. Tap into the latest electrica.

Key Takeaways

The price of a 48-core single-mode optical fiber cable typically ranges from \$1. 50 to \$5 per meter, depending on specifications, armor, and supplier.

Pricing Overview

Alibaba lists 48-core single-mode fiber optic cables for aerial, duct, and submarine use, with prices generally starting around \$1. 50-\$3 per meter for standard OS2 single-mode cables, depending on jacket type (PE or LSZH) and certification.

M

E Fiber Optic offers the GYTY53 outdoor armored double-jacket 48-core single-mode OS2 cable, designed for direct burial and long-distance transmission. These cables are premium, armored, and gel-filled, which typically places them in the \$3-\$5 per meter range.

EL

V Cable provides G. 652D 48-core single-mode armored cables, pre-terminated with connectors, suitable for high-performance networks. Pricing is similar to ME Fiber Optic, reflecting the added value of pre-termination and armored protection.

Ecomtelco offers metallic armored 48-core single-mode cables compliant with ITU-T G. 652D, designed for underground and harsh environments. These cables are optimized for long-distance, high-capacity networks, and their price is generally in the \$3-\$5 per meter range.

Factors Affecting Price

Cable Type: Armored cables (steel tape or double-jacket) cost more than standard non-armored cables. **Fiber Standard:** OS2 single-mode fibers are slightly more expensive than multimode fibers due to lower attenuation and longer transmission distance. **Installation Environment:** Direct burial, outdoor, or submarine-rated cables include additional protective features, increasing cost.

Quantity and Supplier: Bulk orders often reduce per-meter cost, while small quantities or specialized suppliers may charge a premium.

Recommendation

For long-distance outdoor or underground deployment, armored 48-core OS2 cables like GYTY53 or G. 652D are recommended for durability and low attenuation. For indoor or duct installations, standard single-mode cables without heavy armor may suffice, reducing cost.

In summary, expect \$1.50-\$5 per meter for a 48-core single-mode optical cable, with armored and direct-burial variants at the higher end of the range.
