

Prices of various switches for construction site electrical distribution boxes

Overview

Amazon.com: Power Distribution Box Browse power distribution boxes with circuit breaker protection and multiple outlet configurations. Shop durable solution.

Key Takeaways

Switches for construction site distribution boxes vary widely, typically ranging from \$20 for basic circuit breakers to \$200 or more for high-capacity or specialized safety switches. Overview of Switch Types and Pricing

- Standard Circuit Breakers and Switches
- Basic single-pole or double-pole switches for residential or light-duty construction boxes typically cost \$20-\$50 per unit.
- Higher-rated switches (e.g., 60A or 100A) suitable for heavy-duty construction site boxes can range from \$50-\$150 depending on amperage and brand .
- Integrated Safety Switches and Emergency Stops
- Many site boxes include differential switches, emergency stop buttons, and fused disconnects for safety. These integrated switches can cost \$100-\$200 per unit, especially when combined with circuit breakers and waterproof housings .
- Pre-Wired Distribution Boxes with Switches
- Complete pre-wired boxes with multiple switches, circuit breakers, and outlets are available for \$150-\$500 depending on capacity, number of circuits, and IP rating (waterproof/dustproof), .

- For example, a 60A 110V box with four NEMA 5-20 outlets and built-in breakers is priced around \$150-\$200 on Amazon .
- Industrial and Custom Enclosures
- Heavy-duty industrial boxes with multiple switches, three-phase support, and high IP/IK ratings can exceed \$500-\$1,000, especially if customized for specific construction site requirements .
- Brands like Schneider, Walther Werke, and Scame offer robust enclosures with integrated switches suitable for harsh environments .

Factors Affecting Switch Prices

- Amperage and Voltage Rating: Higher current capacity switches cost more.
 - Number of Circuits: More circuits require additional switches and breakers.
 - Safety Features: Differential switches, emergency stops, and fused disconnects increase cost.
 - Enclosure Material and IP Rating: Waterproof, dustproof, and impact-resistant boxes add to the price.
 - Pre-Wiring and Assembly: Pre-assembled boxes with switches are more expensive than individual components.
- #### Recommendations
- For small construction sites, a basic pre-wired box with 20-60A switches and 2-4 outlets is cost-effective.
 - For large or industrial sites, invest in boxes with multiple high-capacity switches, emergency stops, and IP65+ enclosures to ensure safety and durability.
 - Always check certifications (ETL, IEC, NEMA) to ensure compliance with local electrical codes . By considering these factors, you can select switches and distribution boxes that balance cost, safety, and site requirements.
