

Saudi Arabia Single-Fiber Bidirectional SFP

Overview

Designed for single-mode fiber, this BiDi SFP+ module features an LC connector and supports 10 Gbps data rates over distances up to 10 km.

Key Takeaways

Single-fiber bidirectional (BiDi) SFP modules in Saudi Arabia support 1. 25 Gbps to 10 Gbps over single-mode fiber with LC connectors, enabling long-distance, cost-effective network deployment.

Overview of Bi

Di SF

P ModulesSingle-fiber BiDi SFP transceivers allow simultaneous transmit and receive over a single fiber strand, reducing cabling requirements and simplifying network infrastructure. They are widely used in data centers, enterprise networks, and long-distance fiber links. These modules typically use wavelength-division multiplexing (WDM), with one wavelength for transmitting and another for receiving.

Common wavelengths include 1310/1550 nm for 1. 25 Gbps modules and 1270/1330 nm for 10 Gbps modules.
