

Singapore Export Integrated Wiring Cabinet New Model CIF Price

Overview

Establishing Customs Value and Methods | Singapore Customs It is based on the Cost, Insurance and Freight (CIF) value^ under international commercial terms.

Key Takeaways

The CIF price for a new model of integrated wiring cabinet from Singapore includes the cost of the cabinet, insurance, and freight to the destination port, and can be calculated using the FOB price plus shipping and insurance costs.

Understanding CI

F Pricing CIF (Cost, Insurance, and Freight) is an international trade term where the seller in Singapore is responsible for: Cost: The price of the integrated wiring cabinet at the point of origin, including manufacturing, packaging, and handling. Insurance: Minimum insurance coverage for the goods during transit, typically 110% of the FOB value, protecting against loss or damage. Freight: Shipping charges to transport the goods to the buyer's specified port.

Under CI

F terms, the risk of loss transfers to the buyer once the goods are loaded onto the vessel, but the seller must provide insurance for the buyer's protection.

Calculating CIF Price

To calculate the CIF price for an integrated wiring cabinet: Determine the FOB price: Obtain the base price of the cabinet from the Singapore supplier. For example, Schneider Electric provides a 2026 price list for low-voltage electrical distribution products, which may include integrated wiring cabinets. Add Freight Charges: Contact a shipping or freight company to get the cost of transporting the container to the destination port.

Add Insurance Costs: Calculate insurance at approximately 110% of the FOB value to cover potential losses during transit. Formula: $\text{CIF Price} = \text{FOB Price} + \text{Freight Charges} + \text{Insurance Cost}$ Customs Considerations in Singapore When exporting from Singapore, the customs value for GST and import purposes is based on the CIF value, including all charges incidental to delivery to the destination port. If the transaction value method cannot be used, Singapore Customs may use alternative valuation methods based on similar goods or adjusted selling prices.

Practical Steps

Request the latest FOB price from the supplier for the new model. Obtain freight quotes for the container size and destination port. Calculate insurance based on the CIF rules.

Sum these components to get the total CIF price. By following this method, you can determine the total landed cost for importing integrated wiring cabinets from Singapore, ensuring compliance with CIF terms and Singapore Customs valuation rules.
